Croquet	148				

(Index continued inside back Cover.)

We have pleasure in handing you copy of our latest Catalogue, which we trust will be useful and interesting.

**Prices Fluctuating.** Owing to the uncertain state of the Costs of all raw materials, we regret the quoted Prices cannot always be relied upon, but any variation upwards or downwards will always be advised.

Our new premises are larger and more conveniently situated and the new arrangements will enable us to give to our many valued clients even **BETTER SERVICE.**

As in the past we shall aim primarily to see that our goods give satisfaction, and that prices are as low as it is possible to make them consistent with the quality offered. The prices are based on conditions existing at time of printing and are consequently **liable to alteration.**

It is impossible to catalogue everything one needs or can use in the Garden, on the allotment, on the Poultry Farm or Sports Ground, but we can always quote you by return for your actual requirements if you will send us your enquiries.

To all our old patrons and friends we extend our best thanks for their support in the past. New customers will find us courteous, fair and anxious to give that satisfaction which breeds the goodwill so necessary to any business.

**Terms.**—Our payment terms are **Cash with order**, excepting in the case of clients having a **Ledger Account**. New Ledger Accounts may be opened on receipt of customary references.

**Carriage.**—Where goods are **Carriage Paid** same is plainly stated against such goods and where no mention of Carriage is made, goods are **F.O.R.** (Carriage Forward).

Where "**Carriage extra**" is mentioned it is for the single article sent separately, but a number of such articles can be sent together **F.O.R.** at Catalogue Prices.

If Customer desires goods sent by passenger train the cost of carriage must be remitted, as passenger carriage is always prepaid.

**NOTE.**—When ordering, please send full particulars and description of goods required with each order. Please quote references if any have been given with previous correspondence. Please give full name and address and nearest **STATION**. Addresses for goods should be written in **BLOCK LETTERS** for preference. **TREASURY NOTES** and Postal Orders should be sent in **P.O. Registered Envelopes.**

# SMITH & ELLIS, LTD.,

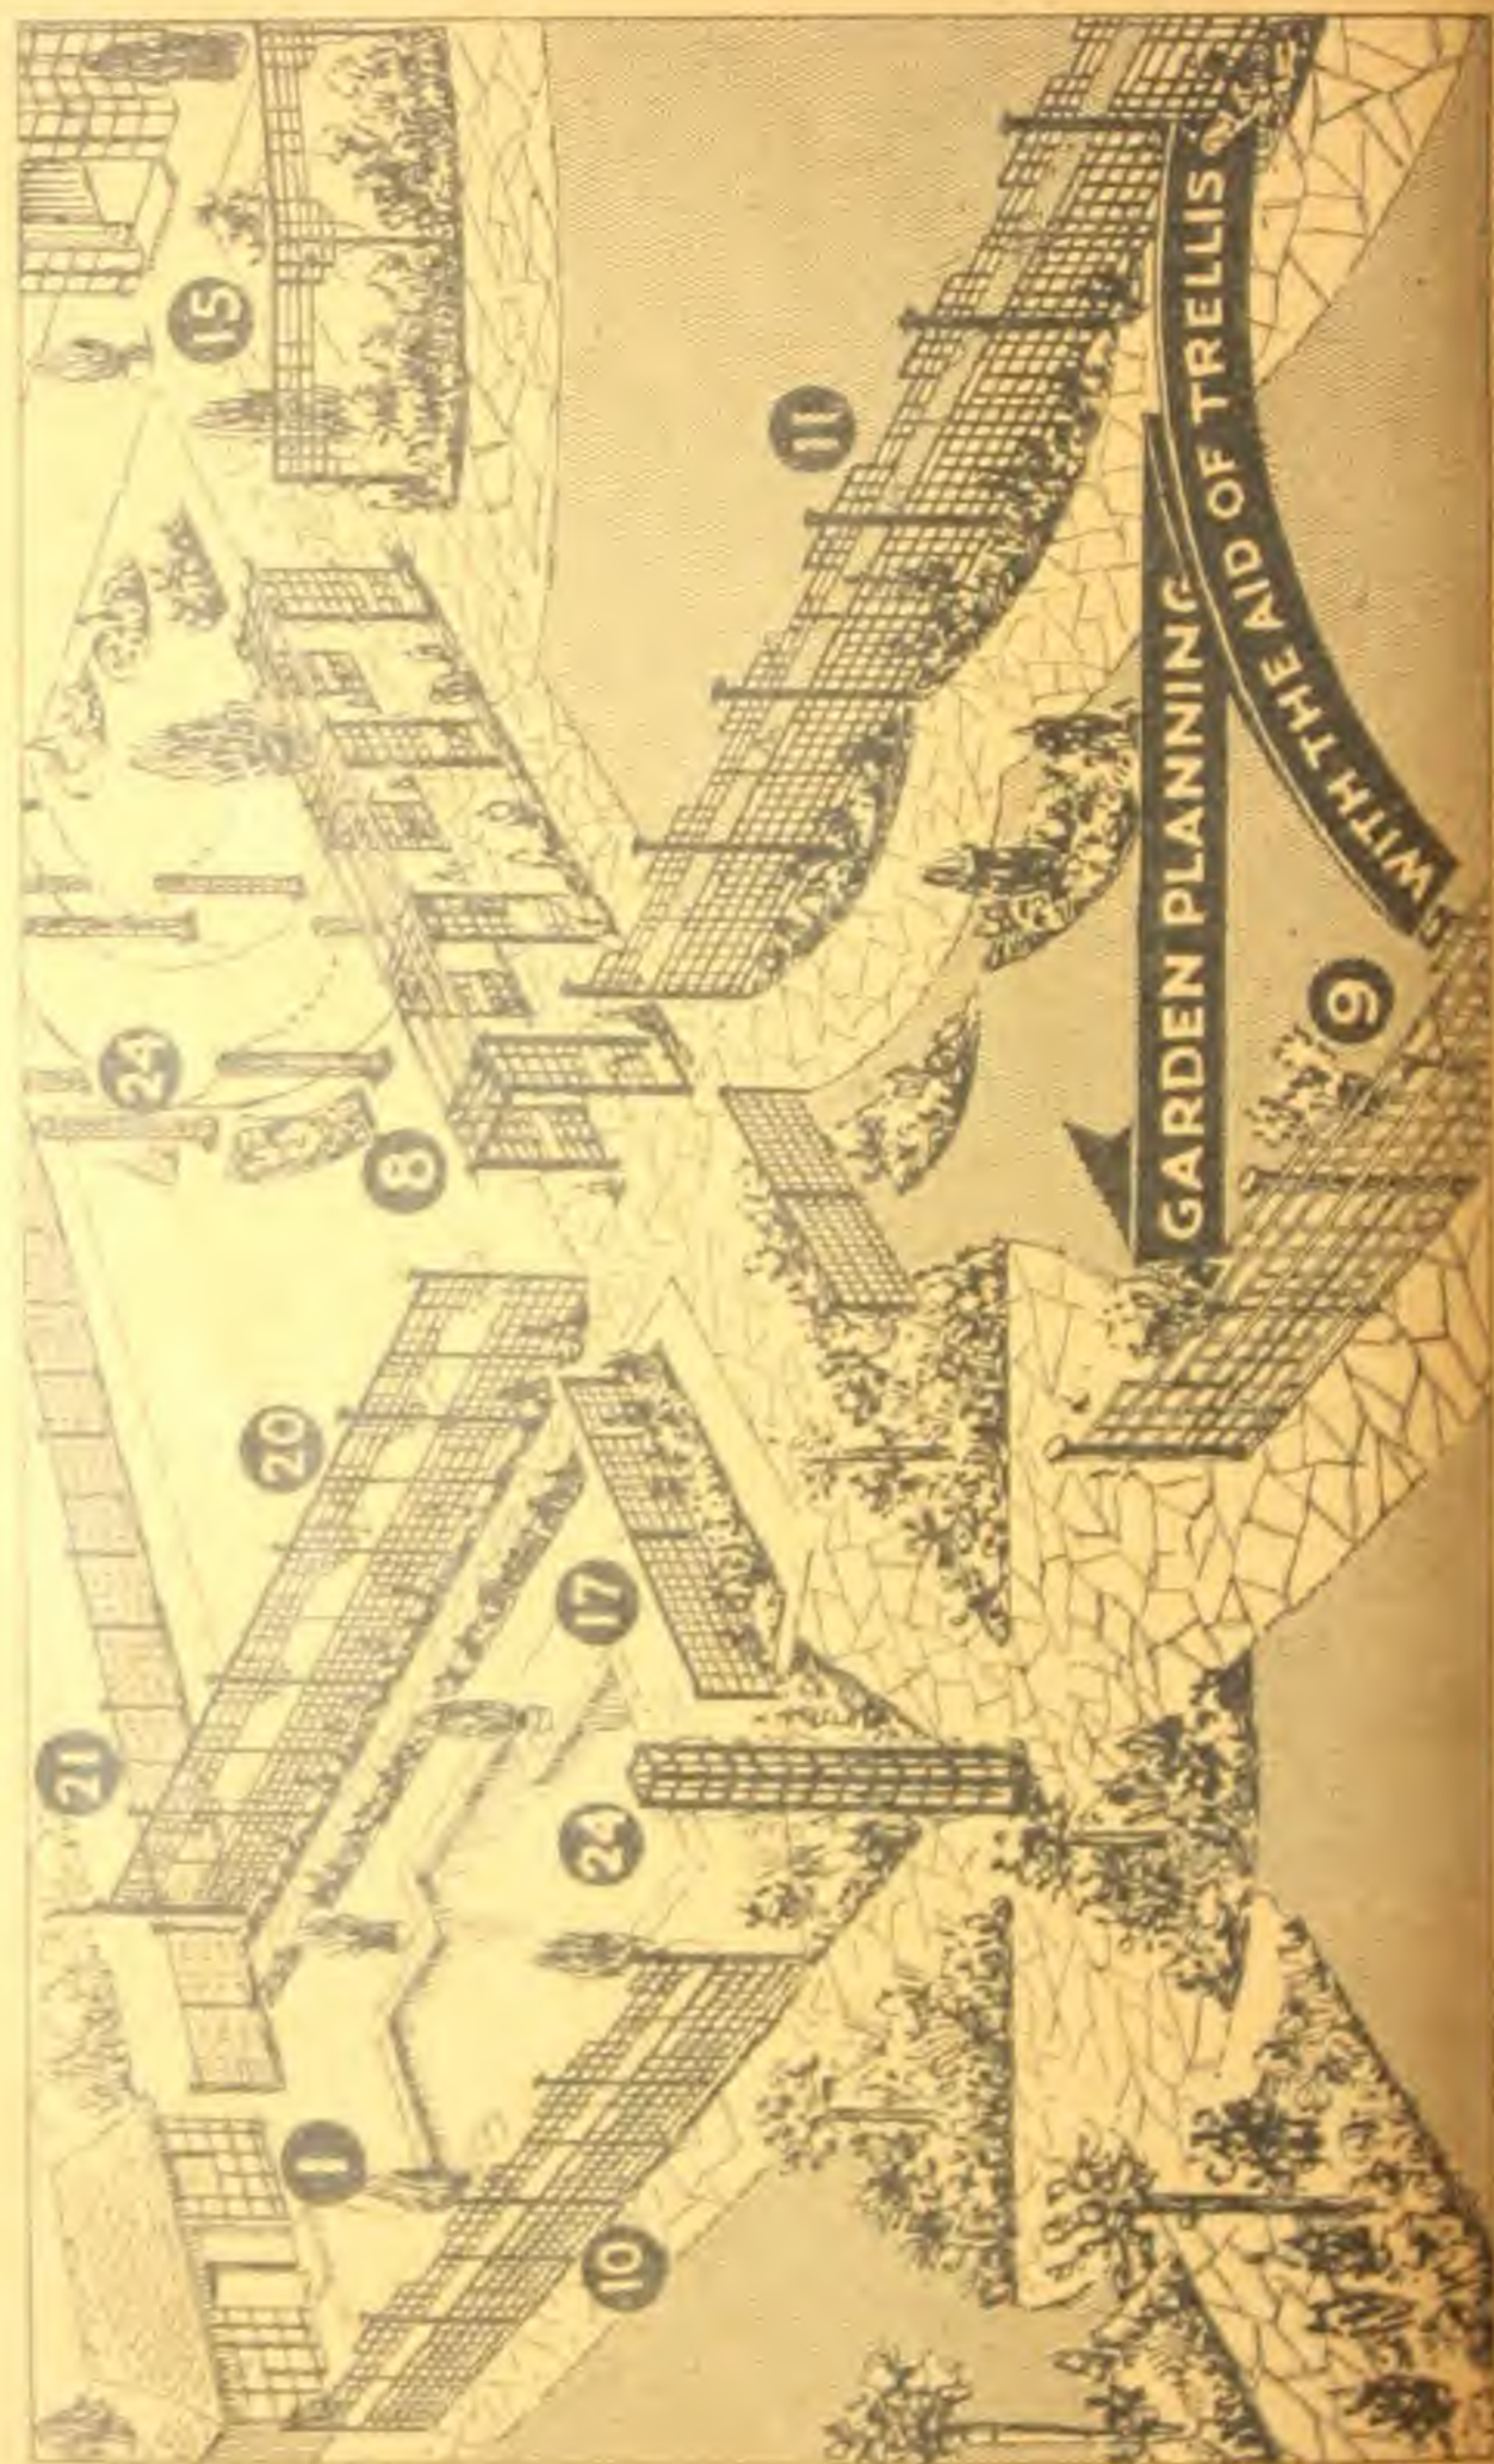

## 193-194, ALDERSGATE STREET,

*Directors:*  
A. J. ELLIOTT.  
G. McQUIRE.  
R. G. McQUIRE.

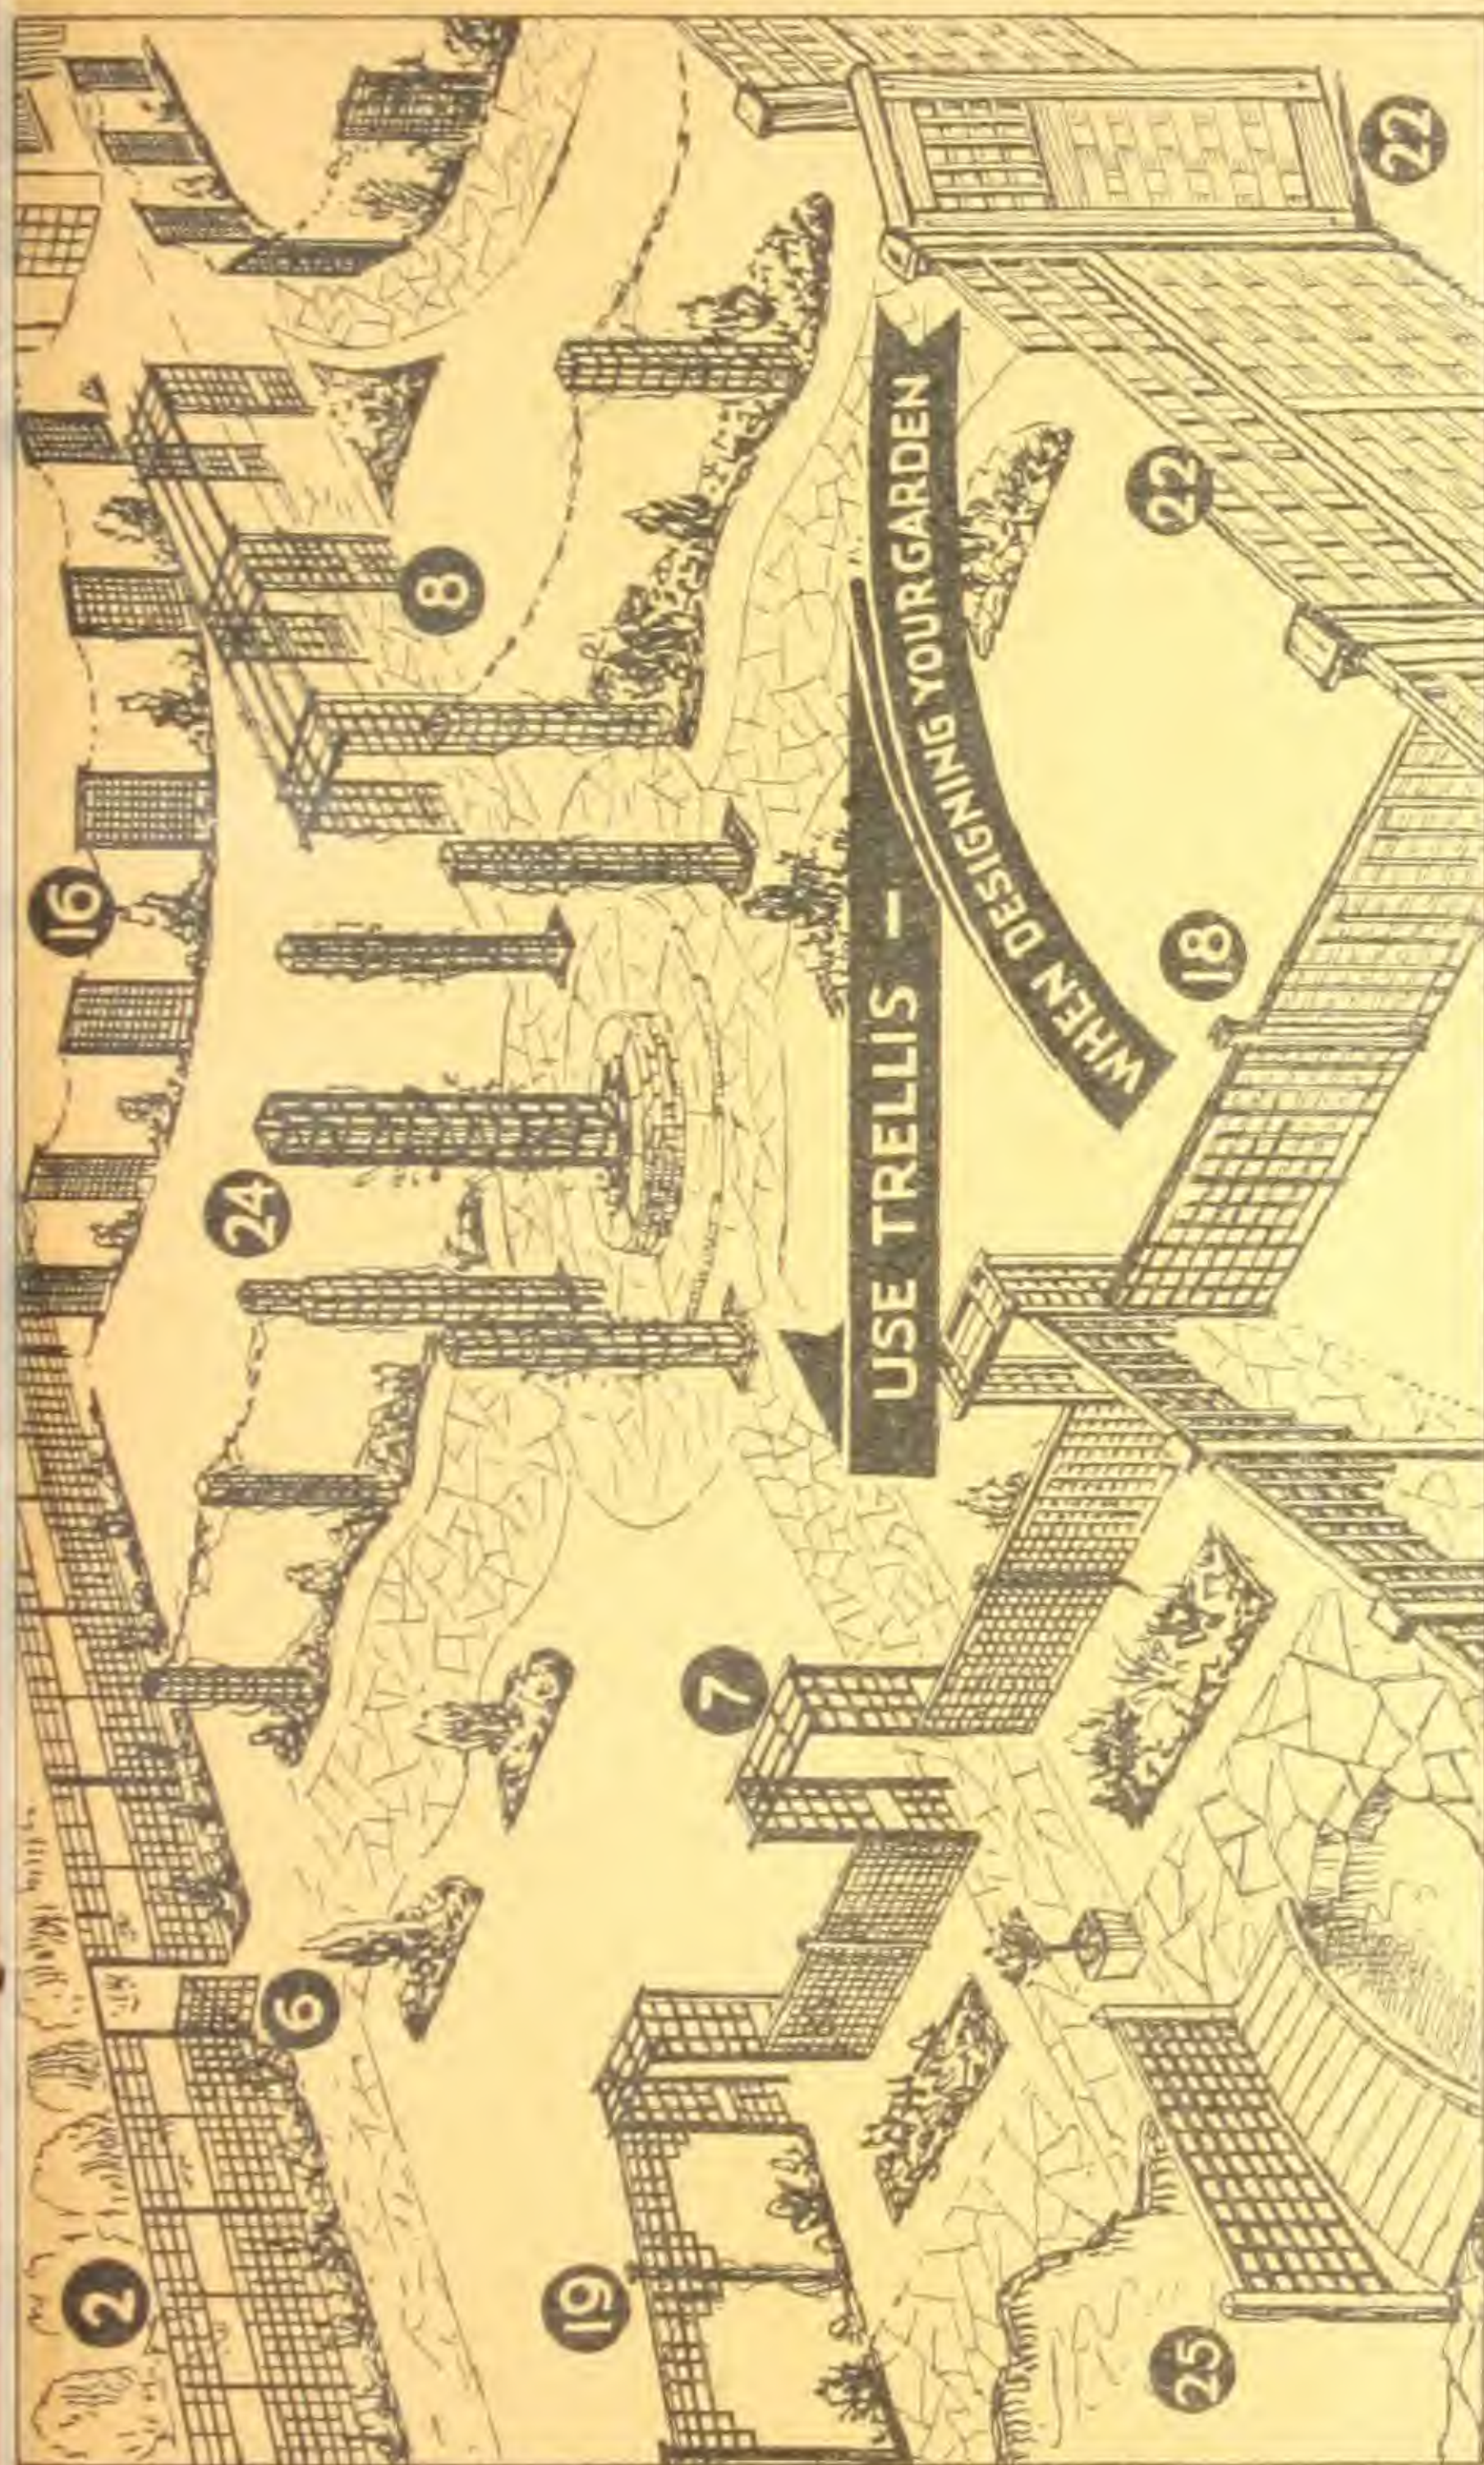

### LONDON, E.C.1.

*Telephone:*  
National 8994.

The figures in the Circles denote the patterns shown in the following pages.

## SQUARE MESH TRELLIS.

Undoubtedly Square Mesh Trellis owes its great popularity to its ability to be adapted to so many artistic designs.

Makes your garden look **larger** by judicious placing.

Delightful **vista** views. Useful **screening**.

In the following pages, many designs will be found and all are priced for supplying in **English Oak** throughout and also for supplying the same designs in woods of **Lesser Cost**. The lasting qualities of **Oak** are too well known to need great emphasis and this is supplied left plain or treated **Brown Solignum**.

In order to meet the demand for our **Square Mesh Trellis** designs lower priced we are making to order any of our patterns using 1-in. by  $\frac{3}{4}$ -in. **Fir** for the filling and sawn **English Larch**, for the supporting posts.

**Soft Wood** for posts going in ground is **useless** and the next best to **Oak** is **English Larch** which is well known as a durable and reliable wood for posts.

The combination of the **Fir** laths and **Larch** posts reduces the cost considerably and in addition the prices set forth below include **Creosoting** which stains a pleasing colour as well as **preserving** the wood.

### Artistic Arches. Figs. 7 and 07.

Size 6-ft. 6-in. out of ground, and 1-ft. 6-in. back to front. Substantial posts as shown below.

(See Note re **Earth Plates** on page 33.)

**Any size Arch can be supplied at short notice.**

Fig. 7. Made from **Oak** throughout.

Fig. 07. Made from **Fir**, with **Larch** Posts all **Creosoted**.

#### Fig 7 Prices.

All above Carriage Paid Stations, England & Wales on orders of 40/- and over.

## SQUARE MESH TRELLIS PANELS.

For Wall Covering, and adding to height of existing fence our Panels as shown below are ideal.

Any Size and Mesh can be quickly made to order, and prices can be quoted immediately on receipt of particulars.

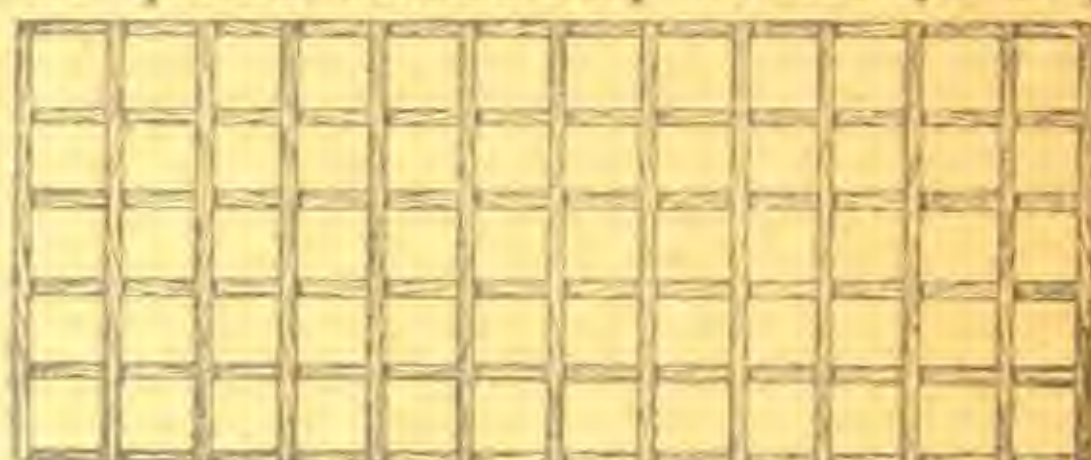

FIG 1

Our stock size is 6-ft. by 2-ft. 6-in., and is made in 3 meshes.

Fig. 1.	Made from	Oak Slats,	1-in. by $\frac{3}{4}$ -in.
" 1H.	" "	" "	1-in. by $\frac{3}{4}$ -in.
" 01.	" "	Fir Slats,	1-in. by $\frac{3}{4}$ -in., Creosoted.
" 01H.	" "	" "	1-in. by $\frac{3}{4}$ -in., "

	Mesh $4\frac{1}{2}$ -in.	4-in.	3-in.	
Fig. 1.	4/-	5/1	6/3 each	Additional framing of 1-in. by $\frac{3}{4}$ -in. all round, 1/6 extra. Ditto, 1/2 extra.
" 1H.	7/-	9/-	10/9 "

" 01H.	4/8	6/-	7/2 "	

### TRELLIS PANELS, FRAMED TOP & SIDES. Figs. 17 & 017.

These panels are framed at top and both sides with our grooved framing  $1\frac{1}{2}$ -in.  $\times$   $1\frac{1}{2}$ -in. (see page 18), and are thus enormously strengthened. In addition they are readily bolted together to form a continuous fence.

Can be supplied in any size to order and stocked in sizes as under. Suitable for tops of walls and fences, also useful as low fencing screens. Posts for use with same, see pages 18 and 19.

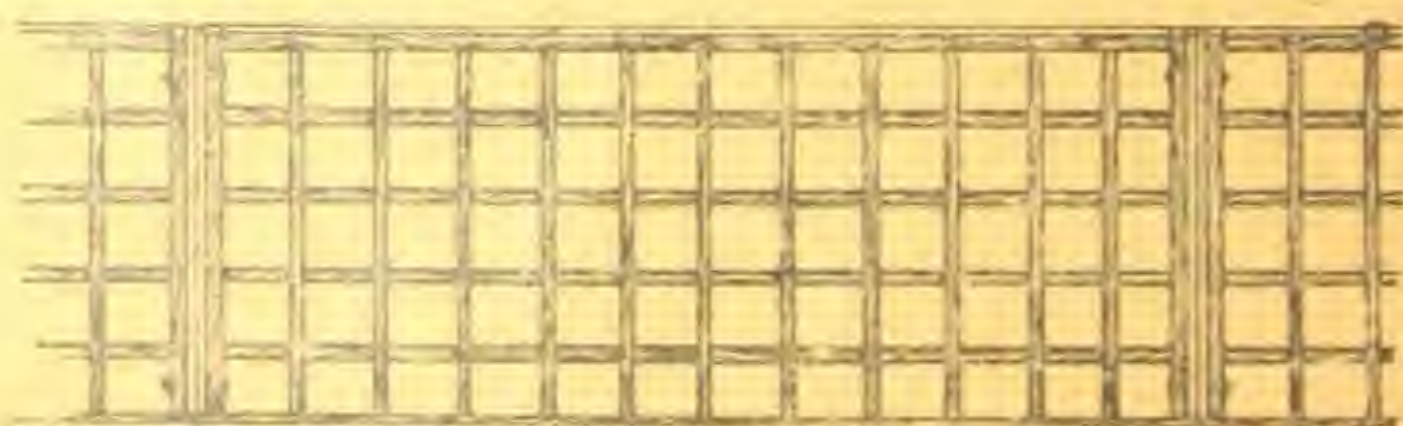

Fig. 17. Made from Oak throughout. Fig. 017. Made from Creosoted Fir.

	4 $\frac{1}{2}$ -in. mesh.		4-in. mesh.		3-in. mesh.	
Size.	Fig. 17	Fig. 017	Fig. 17	Fig. 017	Fig. 17	Fig. 017
8-ft. by 1-ft. ...	6/6	4/9	—	—	8/3	5/9
8-ft. by 1-ft. 6-in. ...	7/6	5/6	8/6	6/-	9/6	6/9

8-ft. by 2-ft. 6-in. ...	10/6	7/6	12/-	8/6	13/6	9/3

Above Oak can be Treated Brown Solignum before putting together at an extra of 15 per cent.

The Fir is Creosoted at prices quoted.

All above Carriage Paid Station, England and Wales on orders of 40/- & over.

## WONDERFUL VALUES

### SQUARE MESH TRELLIS AND ARCHES

**Fig. 001.** Standard 4½-in. mesh. Made in convenient panels for easy erection.

**Well Creosoted before** being put together.

Substantial **English Larch** posts, 2-in. by 1½-in. at 6-ft. intervals are **Included** in the prices. Slats are 1-in. × ½-in.

Your **Exact** measurements only need be ordered but odd inches count as one foot.

### DIVISION TRELLIS.

3-ft. high Trellis with 4-ft. 6-in. posts,	9d. per foot run	} including a post and cap every 6-ft.
4-ft. " " " 5-ft. 6-in. " "	11d. " "	
5-ft. " " " 6-ft. 6-in. " "	1/2 " "	
6-ft. " " " 7-ft. 6-in. " "	1/6 " "	

The 5-ft. and 6-ft. high Trellis is made in **two sections** of equal height which should be placed one above the other to obtain the required 5-ft. or 6-ft.

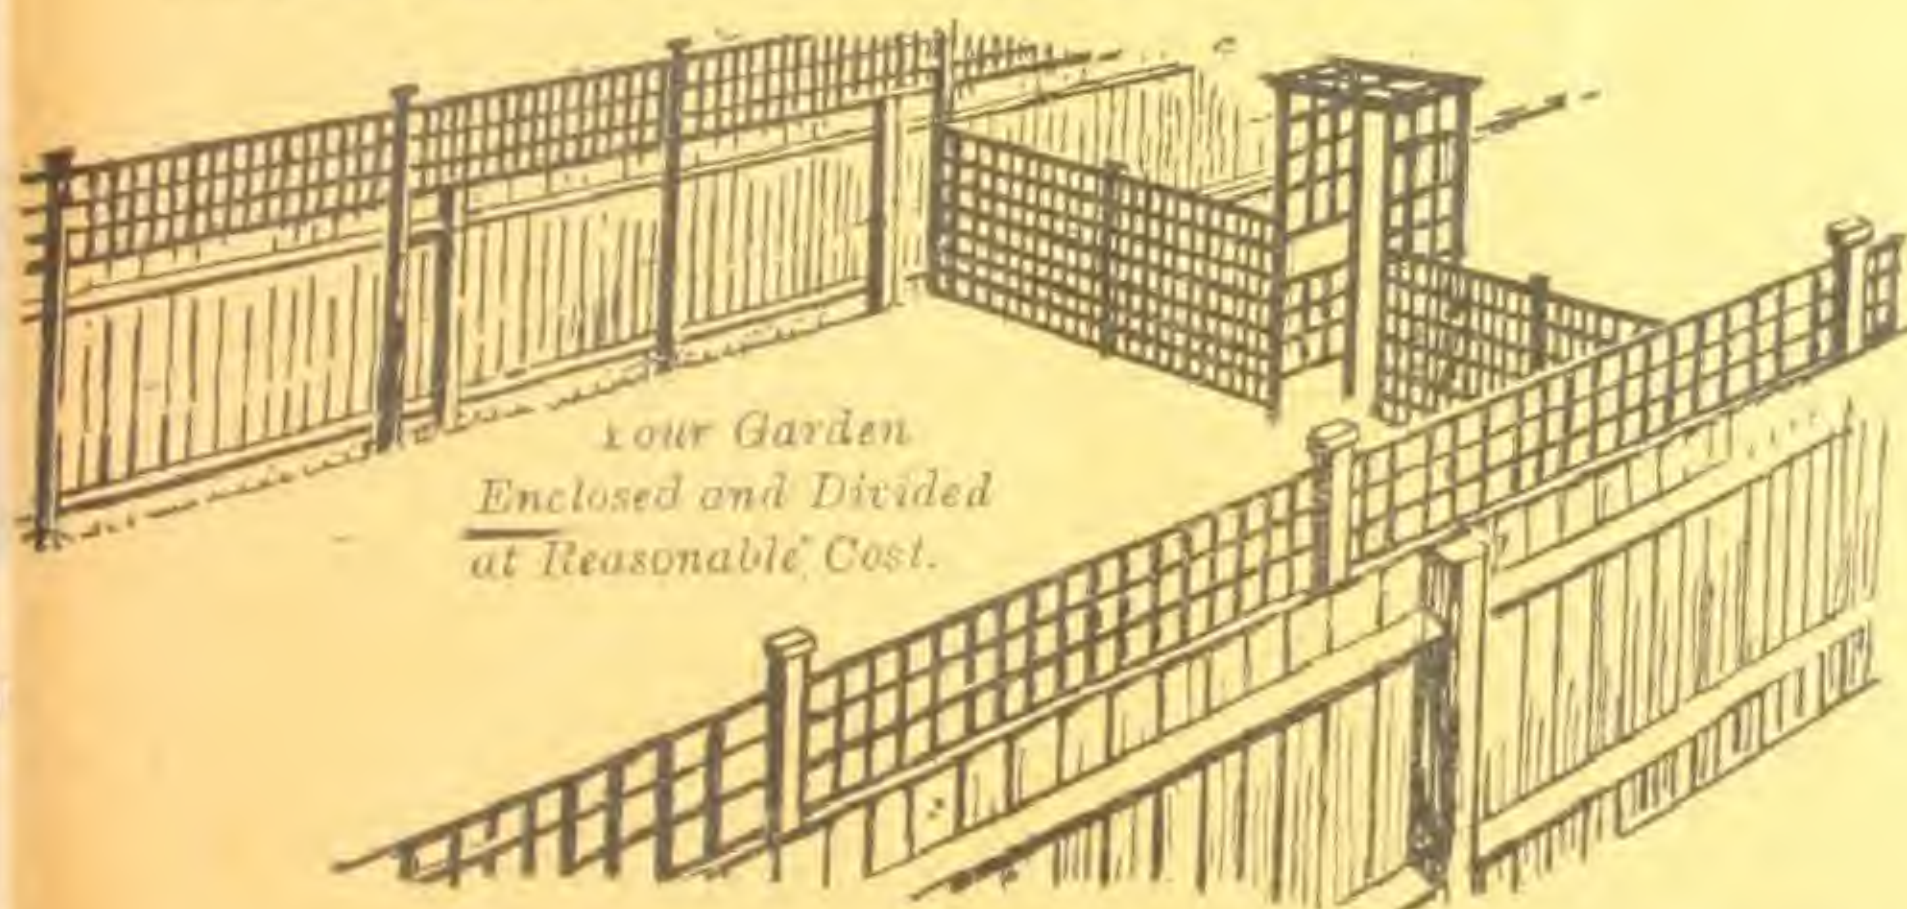

### ARCHES. Fig. 001.

Made in three sections for simple erection.

**English Larch** 1½-in. by 1½-in. for the uprights and all well **Creosoted** before being put together.

Height out of ground, 6-ft. 6-in. and 1-ft. 6-in. back to front.

For 3-ft. path, 6/-, 3-ft. 6-in. path, 6/6, 4-ft. path, 7/6.

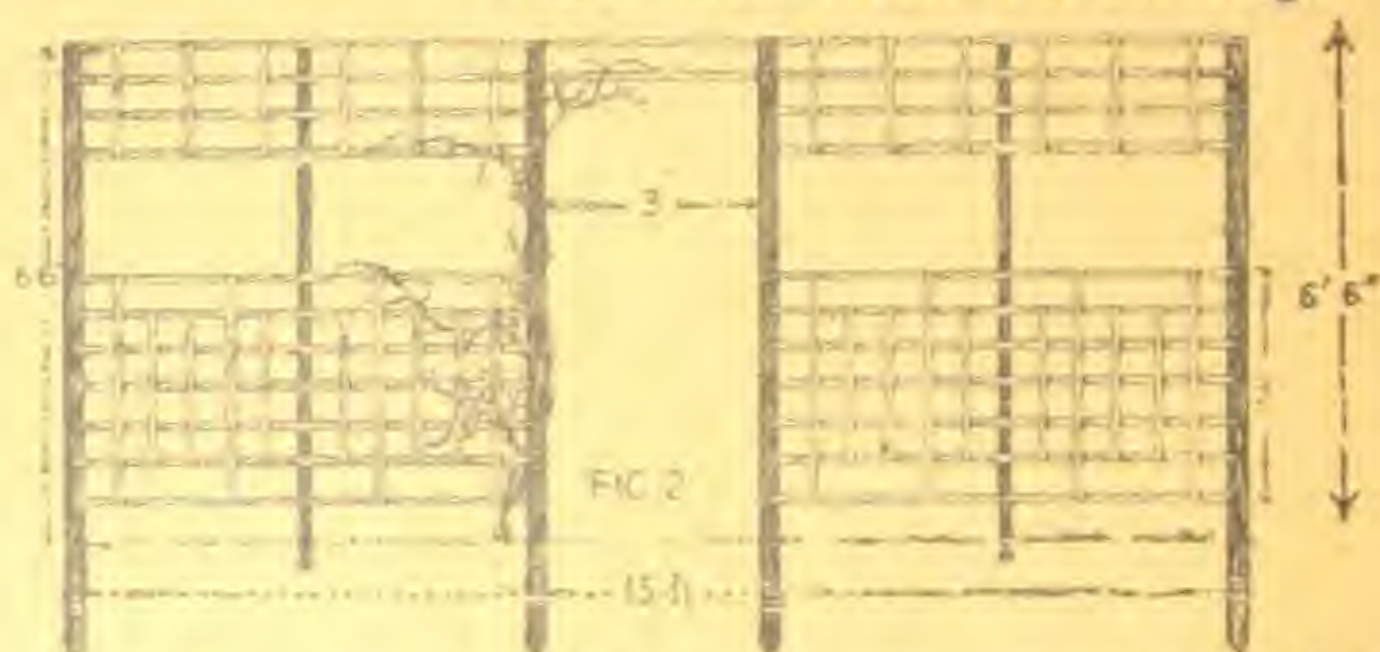

### For ADDING to HEIGHT of EXISTING FENCES.

1-ft. 6-in. high Trellis with 7-ft. Posts,	6d. per foot run	} including a post and cap every 8-ft.
2-ft. " " " 7½-ft. " "	7d. " "	
2-ft. 6-in. " " " 8-ft. " "	8½d. " "	

All above Carriage Paid Station, England and Wales, on orders of 60/- and over.

## Screen with Archway.

Posts are 2-in. by 2-in., 8 ft. long overall. Centre connecting upright of 1-in. by  $\frac{3}{4}$ -in. to go 6-in. in ground. Forwarded in sections for simple erection. 1-in. by  $\frac{3}{4}$ -in. Slats,  $\frac{1}{2}$ -in. Mesh.

**Fig. 2.** Made from **Oak** throughout. Complete 15-ft. Screen **25/-**.

**Fig. 02.** Made from **Fir** with **Larch Posts** all Creosoted. Complete 15-ft. Screen **17/6**.

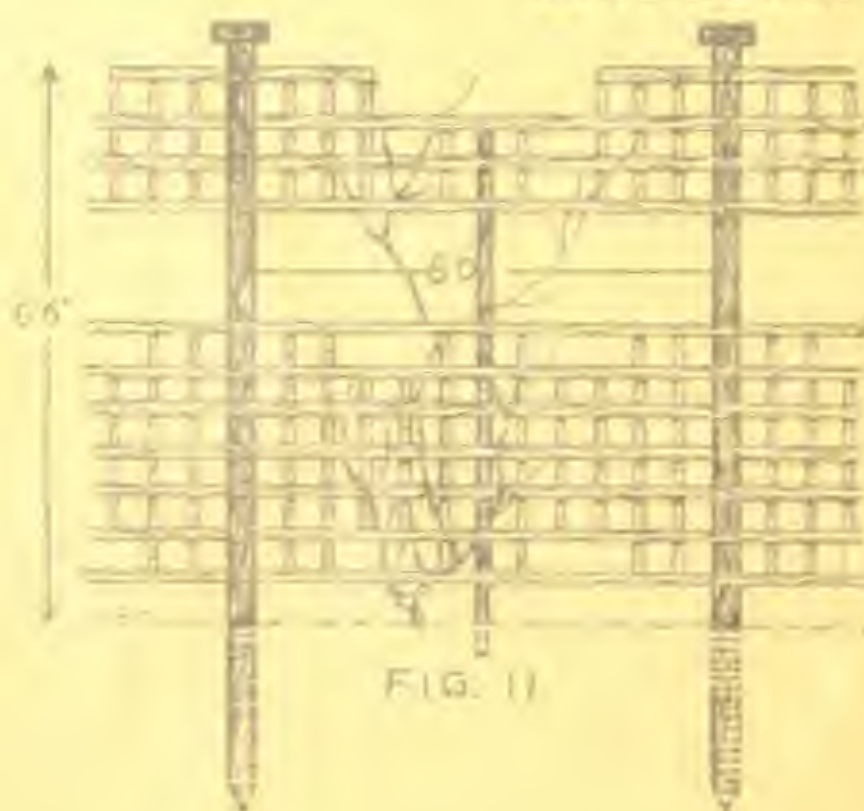

Above provides for fastening Trellis sections to **Face** of posts. If preferred to mount centrally between posts, Trellis sections can be supplied framed on edges with 1-in. by  $\frac{3}{4}$ -in. at an extra cost of 3/- for Fig. 2, or 2/3 for Fig. 02.

(See description given page 10, Fig. 18.)

(See Note re **EARTH PLATES** on page 33.)

The above design can be supplied in **any length** required.

## CONTINUOUS SCREENING. Fig. 11.

Archways as above can be formed by using additional posts. The mesh is  $\frac{1}{2}$ -in. and a Centre Connecting Upright of 1-in. by  $\frac{3}{4}$ -in. to go 6-in. in ground is included. **Prices also include** 8-ft. Posts at 6-ft. intervals.

**EXACT LENGTHS** can be supplied, but odd inches are reckoned as 1 ft.

Per foot run.

<b>Fig. 11.</b>	Made from <b>Oak</b> throughout, 1-in. by $\frac{3}{4}$ -in. Slats, 2-in. by 2-in. Posts	<b>2/1</b>
" <b>11H.</b>	Made from <b>Oak</b> throughout, 1-in. by $\frac{3}{4}$ -in. Slats, 3-in. by 2-in. Posts	<b>3/2</b>

Above **Oak Treated Brown Solignum** before being put together, 15 per cent. extra.

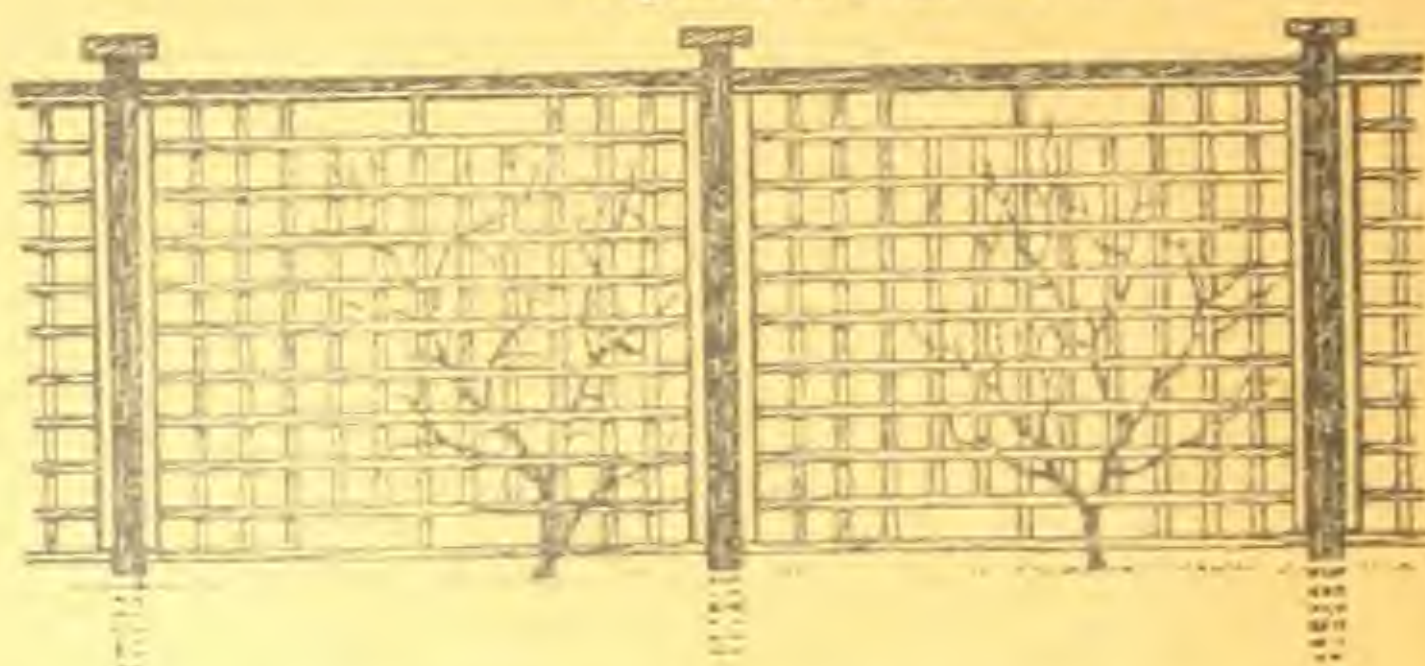

**Figs. 9H, 09H, 10H and 010H** should be fitted centrally between the posts, which should have the 2-in. facing, being nailed or screwed through the side fillets to the posts, which are 3-in. by 2-in.

All above Carriage Paid Station, England and Wales, on orders of 40/- and over.

## Extra Strong Continuous Screening & Fencing.

Figs. 18 & 018. 4½-in. mesh.

Each panel framed both sides on the upright edges by 1-in. x 2-in. Fillets are framed at top and bottom by a heavy 2-in. Grooved Capping. Thus the Panels can be mounted centrally between the uprights, making

exceptionally Strong but Artistic Fence or Screen. This method is ideal for division Fences. Fixing is a simple task. You merely nail or screw through the side fillets to the posts which are 2-in. by 2-in. No other nailing is required.

All prices are inclusive of posts and caps at 6-ft. intervals.

Fig. 18. Made from **Oak** throughout, 1-in. by 2-in. Slats.

" 018. Made from **Fir** with **Larch** Posts, all **Creosoted**, 1-in. by 2-in. Slats.

In between heights at pro rata prices.

**EXACT LENGTHS** can be supplied, but odd inches should be reckoned as 1 ft.

## Continuous Screening. Figs. 20 & 020.

An effective design adding to the appearance of any garden.

Substantial posts 8-ft. by 2-in. by 2-in. Top section surmounted by **Heavy 2-in. Grooved Capping**, and both sections framed at sides with 1-in. by 2-in. to enable trellis to be mounted centrally between uprights. Centre connecting upright of 1-in. by 2-in. to go 6-in. in ground. Slats are 1-in. by 2-in.

**Prices include** Posts at 6-ft. intervals.

Fig. 20. Made from **Oak** throughout at 3/- per foot run.

" 020. Made from **Fir** with **Larch** Posts, all **Creosoted**, at 2/- per foot run.

When ordering either of above patterns, please state the total over-all length of space to be occupied.

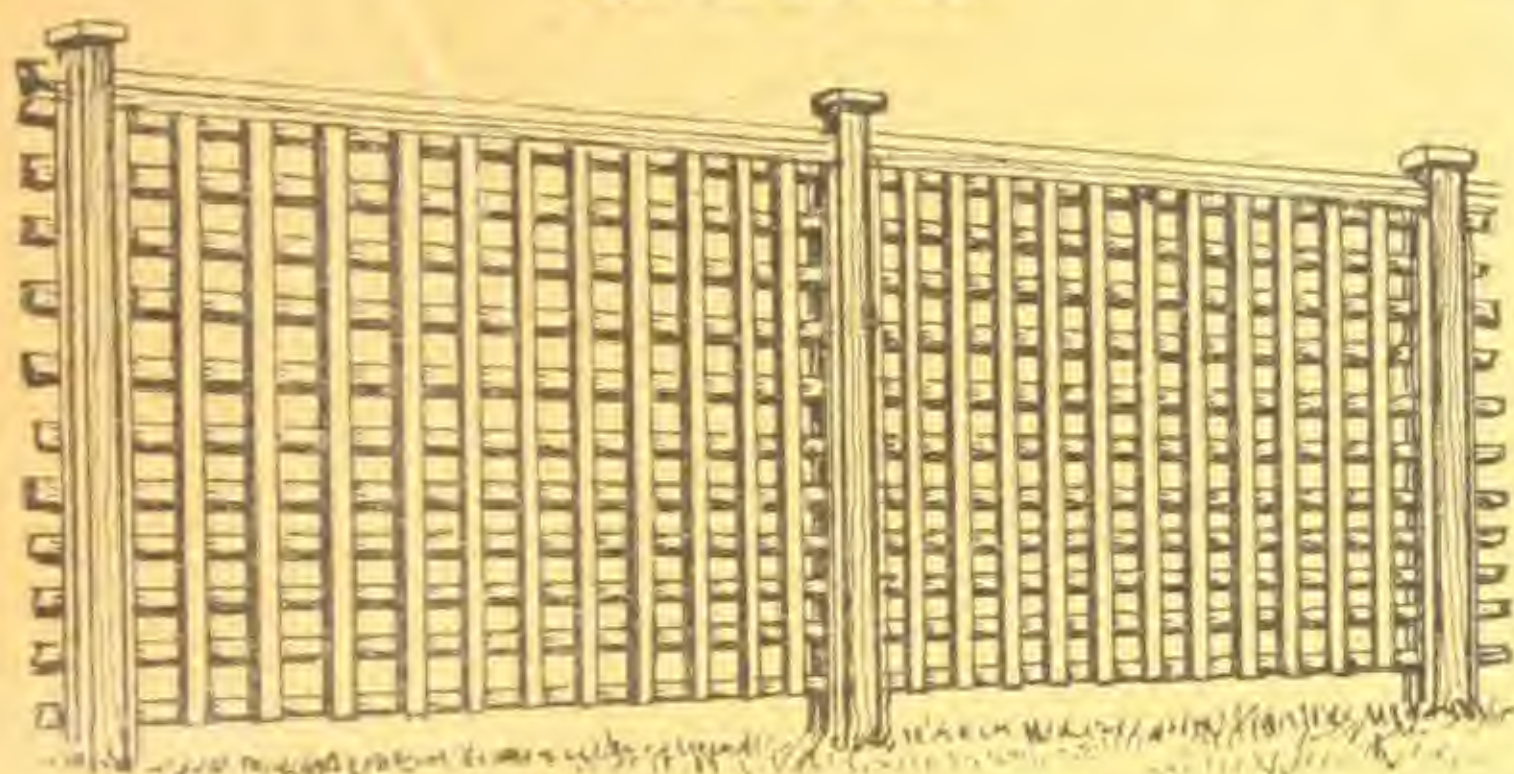

Above **Oak Treated Brown Solignum** before being put together, **15 per cent extra**.

All above Carriage Paid Station, England and Wales, on orders of 40/- and over.

## Extra Strong Continuous SCREENING & FENCING

Figs. 23 and 023.

This pattern is similar to Fig. 18, but the **Slats** are 1-in. by  $\frac{3}{4}$ -in. throughout, with two slats on the edges to enable the trellis panel to be fixed centrally between the posts as in Fig. 18, and a 2 $\frac{1}{2}$ -in. Capping is included. **Posts** are 3-in. by 2-in. and should be used with the 2-in. facing. All prices are inclusive of uprights and caps at 6-ft. intervals.

**Fig. 23.** Made from **Oak** throughout.

" **023.** Made from **Fir** with **Larch** Posts, all **Creosoted**.

### Continuous Screening

Figs. 25 and 025.

Our Fig. 20 Artistic Screening carried out in 1-in. by  $\frac{3}{4}$ -in. **Slats** throughout, with 3-in. by 2-in. Posts and Capping as above. Arranged for central fixing between the Posts, which are 8 $\frac{1}{2}$ -ft. by 3-in. by 2-in.

**Prices include** Posts at 6-ft. intervals.

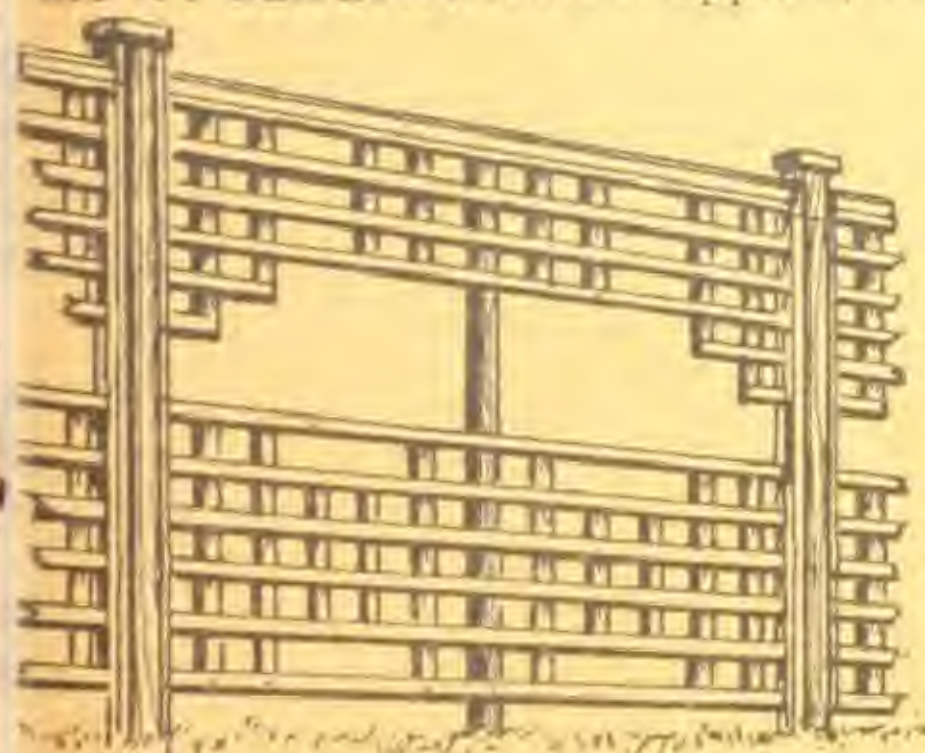

**Fig. 25.** Made from **Oak** throughout at 3/4 per foot run.

" **025.** Made from **Fir** with **Larch** Posts, all **Creosoted**, at 2/3 per foot run.

**When ordering either of above patterns.** please state the total over-all length of space to be occupied.

Above **Oak Treated Brown Solignum** before being put together, 15 per cent. extra.

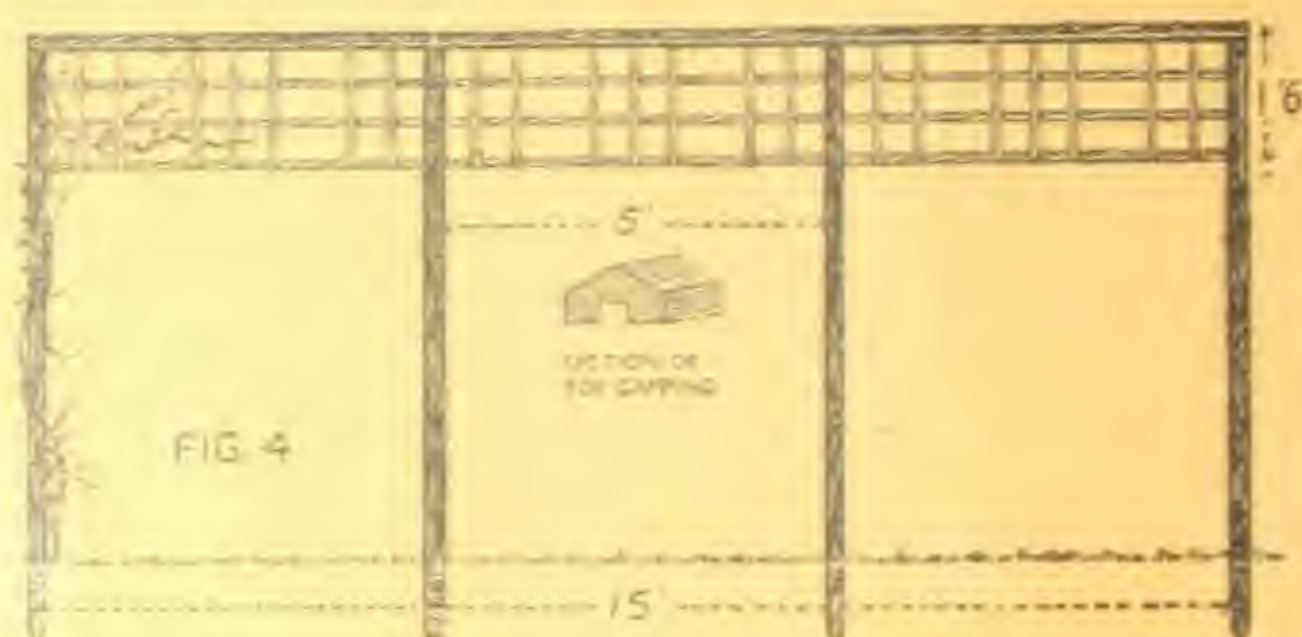

All above Carriage Paid Station, England and Wales on orders of 40/- and over.

## Artistic Roserys or Lawn Surrounds.

Figs. 4 & 04.

Posts are 2-in. by 1½-in. 8-ft. long overall and Trellis is 1-ft. 6-in. deep. **Top Capping** gives an artistic finish as well as added strength. Posts at 5-ft. intervals are included in the prices.

**EXACT LENGTH** can be supplied, but odd inches are reckoned as one foot.

Fig. 4. Made from **Oak** throughout at 1/3 per foot run.

Fig. 04. Made from **Fir** with **Larch Posts** all **Creosoted** at 11d. per foot run.

Figs. 15 & 015.

Posts are 2-in. by 1½-in. 8-ft. overall. Trellis Sections Strengthened by grooved Top Capping 1½-in. x 1½-in. Screen is shown 15-ft. long, but can be made to any desired length. Posts at 5-ft. intervals are included in the prices.

In both of above patterns, Trellis Sections fasten to face of uprights.

Fig. 15. Made from **Oak** throughout at 1/4 per foot run.

Fig. 015. **Fir Laths** and **Larch Posts** all **Creosoted** at 1/- per foot run.

**EXACT LENGTH** can be supplied, but odd inches are reckoned as one foot.

For all designs see Note re **Earth Plates** on page 33.

Above **Oak Treated Brown Solignum** before being put together 15 per cent. extra. Figs. 04 and 015 are **Creosoted** at quoted prices.

All above Carriage Paid Station, England and Wales on orders of 40/- & over.

## TRELLIS ROSERYS, Etc.

Figs. 19 & 019.

Substantial 8-ft.  $\times$  2-in.  $\times$  2-in. Uprights with Caps, heavy 2-in. Capping. Framed at sides with 1-in.  $\times$   $\frac{1}{2}$ -in. fillets to enable Trellis to be mounted centrally between Posts. See description of Fig. 18 on page 10.

Prices include Uprights at 5-ft. intervals.

**Fig. 19.** Made from **Oak** throughout at 2/- per foot run.

**Fig. 019.** Made from **Fir** with **Larch Posts** all **Creosoted** at 1.5 per foot run. **EXACT LENGTH** can be supplied, but odd inches count as one foot.

## TRELLIS SCREEN WITH PERGOLA CHAIN.

Figs. 16 & 016.

Posts are 2-in.  $\times$  2-in., 8-ft. overall with usual fitting. Cross bars on top of tall screens are 2-in.  $\times$  1 $\frac{1}{2}$ -in. with bavelled ends. Screen as shown is 21-ft. overall but can be varied to your own requirements.

Price complete with 3 uprights, cross bars and green-painted pergola chain.

**Fig. 16.** Made from **Oak** throughout. Price complete as above 46/-.

**Fig. 016.** Made from **Fir** with **Larch Posts** all **Creosoted**. Price complete as above 34/-.

Above provides for fastening trellis sections to face of posts. If preferred to mount centrally between posts sections can be supplied framed on edges with 1-in.  $\times$   $\frac{1}{2}$ -in. at an extra cost of 8/- for Fig. 16 or 6/- for Fig. 016. (See description given on page 10, Fig. 18.)

Above **Oak Treated Brown Solignum** before being put together 15 per cent. extra. Figs. 019 and 016 are **Creosoted** at quoted prices.

All above Carriage Paid Station, England and Wales, on orders of 40/- and over.

**PERGOLA CHAIN.** Green Enamelled. As used in above design 7d. per yard.

**PERGOLA ROPE.** Coconut Fibre Rose Training Rope, always warm.

2-in. circumference 4d., 2 $\frac{1}{2}$ -in. ditto 7d., 3-in. ditto 10d. per yard.

## ROSE CLIMBING and PERGOLA PILLARS.

Suitable for use as **SINGLE PILLARS** or can be connected to make **ARTISTIC PERGOLAS**. Made up by **FOUR TRELLIS** sections, each 6-ft. by 1-ft., and with **FOUR POSTS** 7-ft. 6-in. long by 1½-in. by 1½-in., giving 6 ft. 6-in. out of ground and 1-ft. square.

Fig. 24. Made from **OAK** throughout, 12/- each complete **Pillar**.

Fig. 024. Made from **FIR** slats, **LARCH** posts, all **Creosoted**, 8/6 each.

If 1-ft. 6-in. square with same posts, 3/- and 2/- extra respectively.

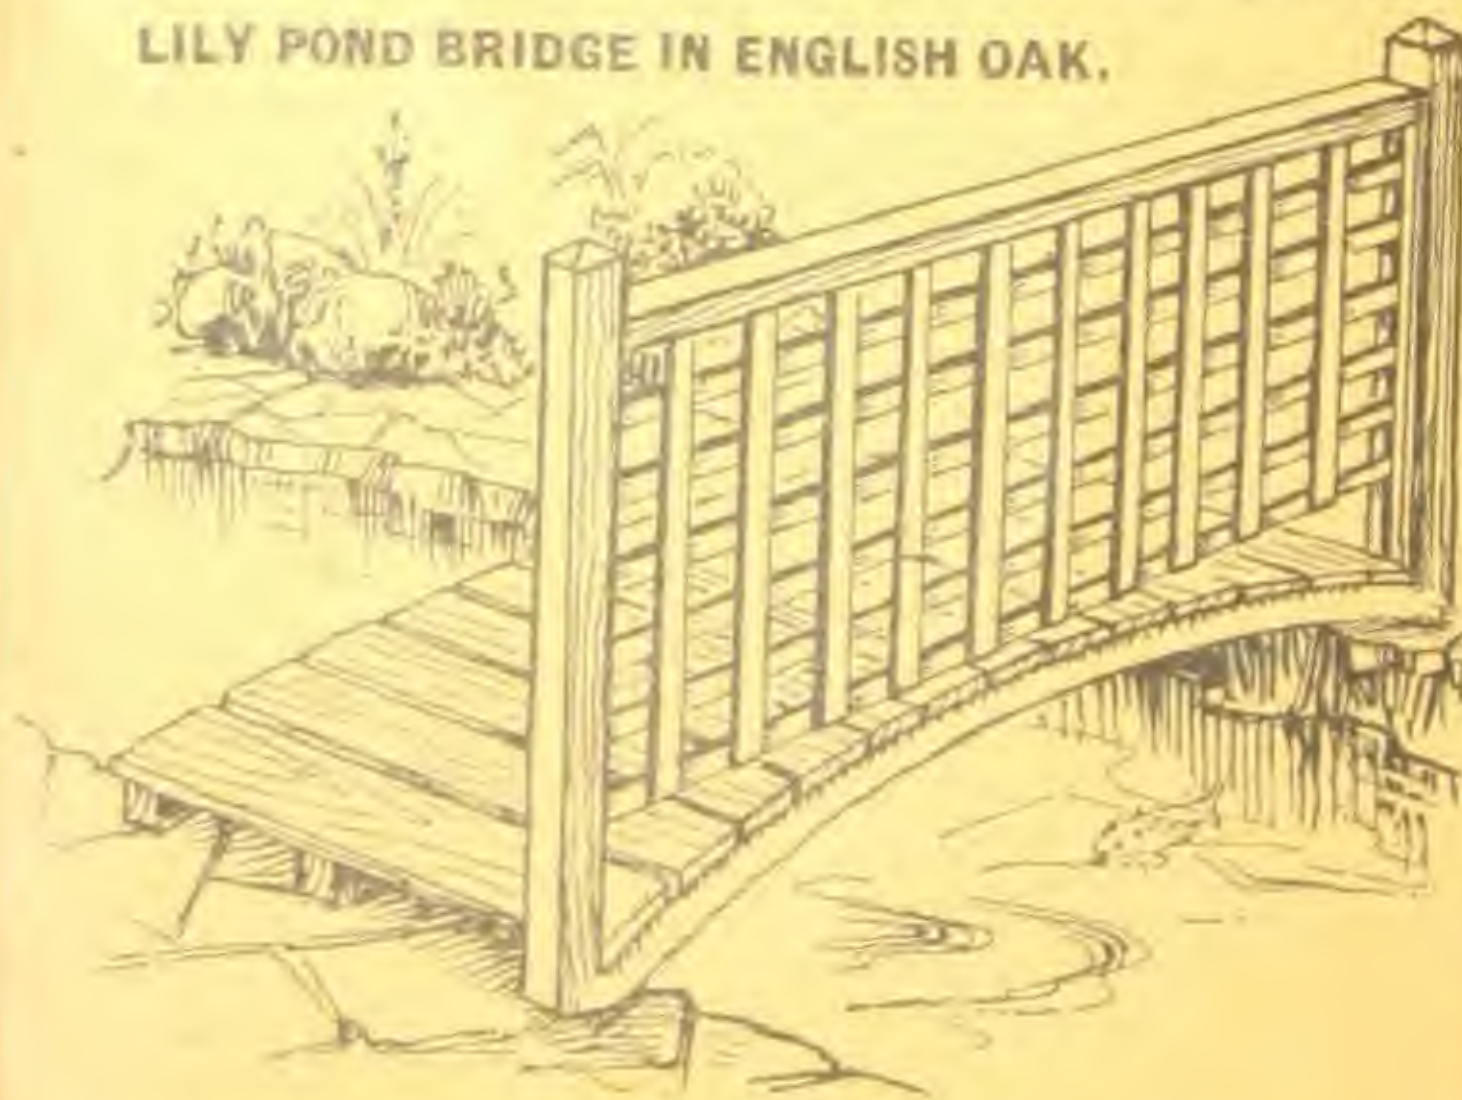

Above **Oak** can be **Treated Brown Solignum** before putting together at an extra of 15 per cent. The **Fir** is **Creosoted** at prices quoted.

**PERGOLA CHAIN.** Green Enamelled. As used in above design 7d. per yard.

**PERGOLA ROPE.** Coconut Fibre Rose Training Rope, always warm. 2-in. circumference 4d., 2½-in. ditto 7d., 3-in. ditto 10d. per yard.

All above Carriage Paid Station, England and Wales on orders of 40/- & over.

## LILY POND BRIDGE IN ENGLISH OAK.

**Bridge** is constructed throughout from **OAK** of suitable substance to give safety and long life. Three **BOTTOM BEARERS** of 4-in. by 2-in. curved to give 9-in. rise in centre. **Footway** consists of fourteen boards 2-ft. 6-in. by 4-in. by 1-in. The **Side** which is sent complete with Trellis fixed, consists of two **Posts** 4-ft. 6-in. by 4-in. by 4-in., mortised top and bottom. **Hand Rail** is tenoned and pegged, and bottom bearer is securely bolted to the Posts.

**NO EXCAVATION** required for posts. The **Bridge** rests securely on the ground by its own weight and construction. Easily and quickly erected. The 9-in. rise in the span provides for spanning varying spaces. Span 5-ft. Width of Footway 2-ft. 6-in. Price complete: In plain Oak, 70/- If treated Brown Solignum, 80/- Carriage Paid Station, England and Wales.

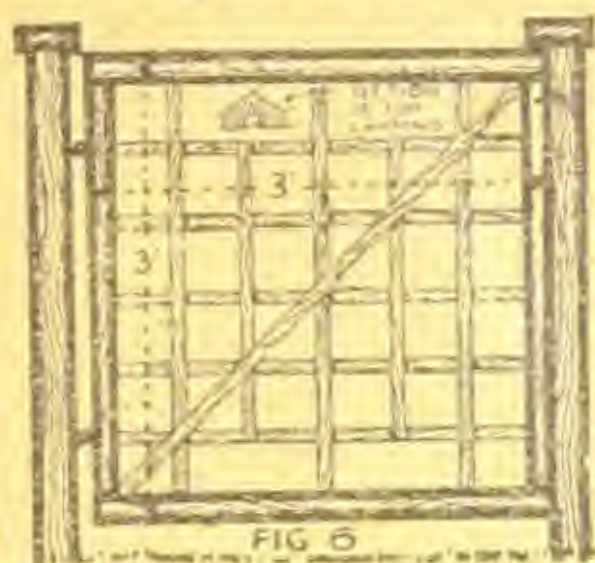

## Light Trellis Gates. 4 $\frac{1}{2}$ -in. Mesh.

Suitable for ARCHWAY of Fig. 2 or with Fig. 7 ARCHES. Can also be used with all kinds of screening. Framed both sides and bottom with 1 $\frac{1}{2}$ -in. by 1 $\frac{1}{2}$ -in. Grooving and finished with Grooved Top Capping. Corners strengthened with Iron Joints. Hook and Eye Fittings for Hanging included. Posts extra.

Other sizes made to order.

Figs. 6 and 5. Made from Oak throughout. Figs. 06 and 05. Made from Creosoted Fir.

Figs. 6 & 06.

Sizes.	1 $\frac{1}{2}$ -in. Grooved Framing.		2-in. Grooved Framing.

3-ft. „ by 6 ft. „ ...	26/6	21/-

Above Oak can be Treated Brown Solignum before being put together at an extra of 15 per cent. The Fir is Creosoted at quoted prices.

## Light Gates, part boarded.

These Gates can be supplied in exact sizes to order. They are stronger than the Trellis Gate, Fig. 6 above, and are very suitable for Side Gates, etc. Selected Deal T. & G. boards with our Oak Trellis work at top. Prices include hinges and Suffolk latch, but not the Posts.

Posts suitable for above gates see pages 18 & 19.

5-ft. high (4-ft. boarded) by 2-ft. 6-in. wide ...	17/6
6-ft. „ (4-ft. 6-in. boarded) by 2-ft. 6-in. wide	19/6

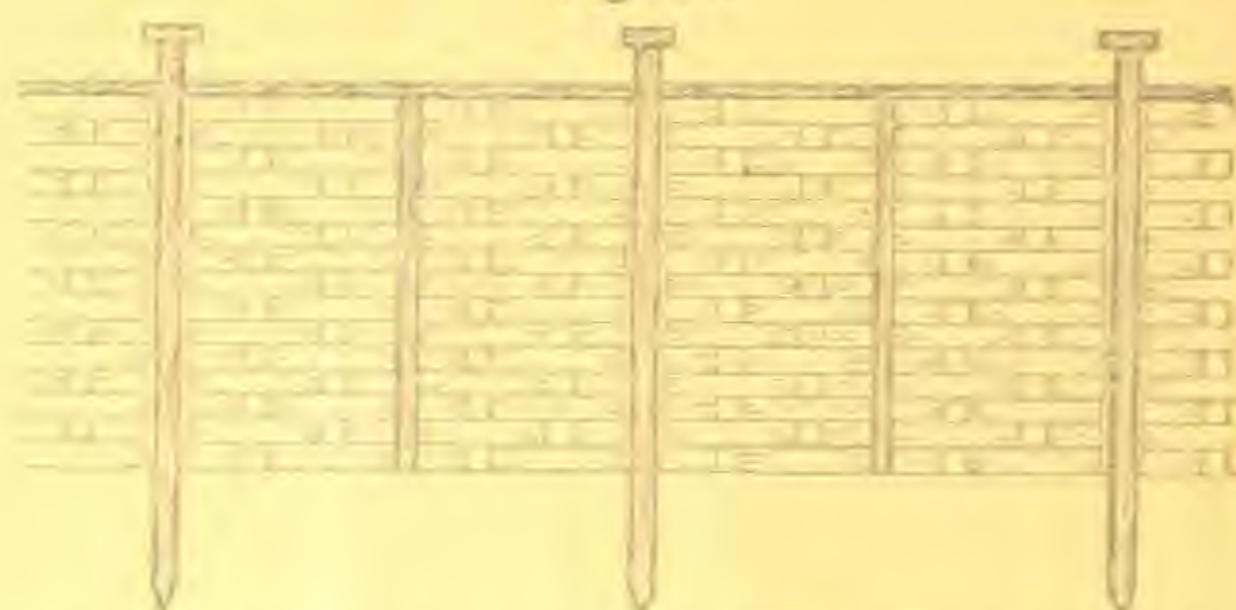

Treated Brown Solignum (before being put together)  
15 per cent. extra.

All above Carriage Paid Station, England and Wales on orders of 40/- & over.

## INTERWOVEN FENCING.

Fig. 21.

Made of Spruce, 4-in. by  $\frac{1}{8}$ -in., closely woven, framed at ends with 1-in. by  $\frac{3}{4}$ -in. fillets and stayed in centre by 2-in. by  $\frac{3}{4}$ -in. The Weaving gives strength and makes the fencing attractive in appearance. Each section is complete and ready for erection—a simple matter—merely nailing or screwing through the side fillets to

the uprights. Sections are 6-ft. in length and a bevelled Top Rail is provided. All the material is **treated Brown Wood Preservative** before being put together.

**EXACT LENGTH** can be supplied, but odd inches should be reckoned as 1 ft.

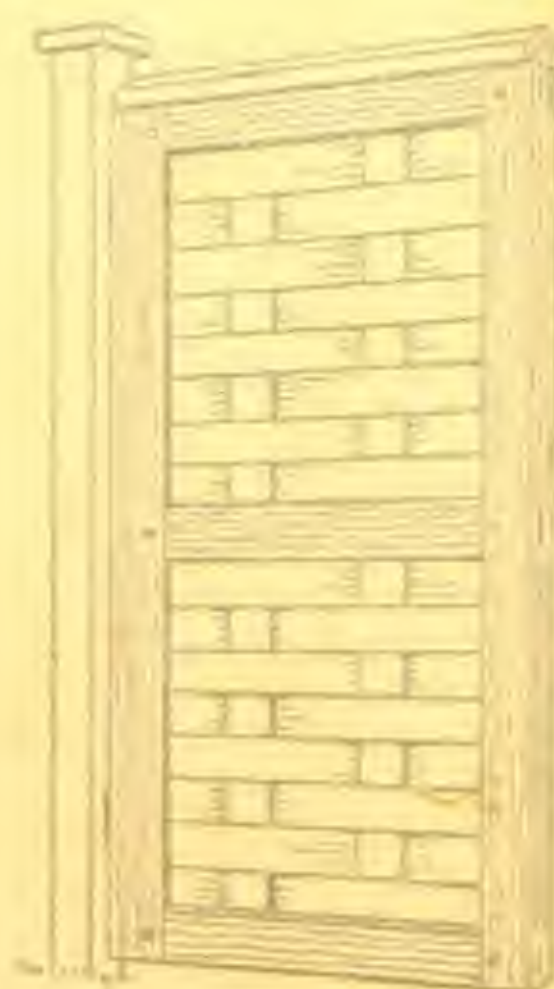

Prices inclusive of 2-in. by 2-in. **Oak Posts** or 3-in. by 2-in. **Larch Posts** as preferred at 6-ft. intervals.

Height of fencing	...	2-ft.	3-ft.	4-ft.	5-ft.	6-ft.
Length of posts	...	3½-ft.	4½-ft.	6-ft.	7-ft.	8½-ft.
Price per foot run	...	1/4	1/7	1/10	2/3	2/9

Where the **Interwoven** fencing is required for adding to height of existing fence, longer Posts can be provided at slight extra cost, and height of the **Interwoven** can also be varied as required.

(See Note re **EARTH PLATES** on page 33.)

## GATES TO MATCH ABOVE.

The Gates are **Joiner** made with substantial 4-in. by 1½-in. framing, mortised and braced. Complete with strong hinges and **Suffolk** latch. Posts extra.

Height.	2-ft. 6-in. wide.	3-ft. wide.
3-ft.	12/6	14/6 each
4-ft.	15/3	18/- "
5-ft.	18/6	21/- "
6-ft.	22/-	24/6 "

All above Carriage Paid Station, England and Wales on orders of 60/- and over

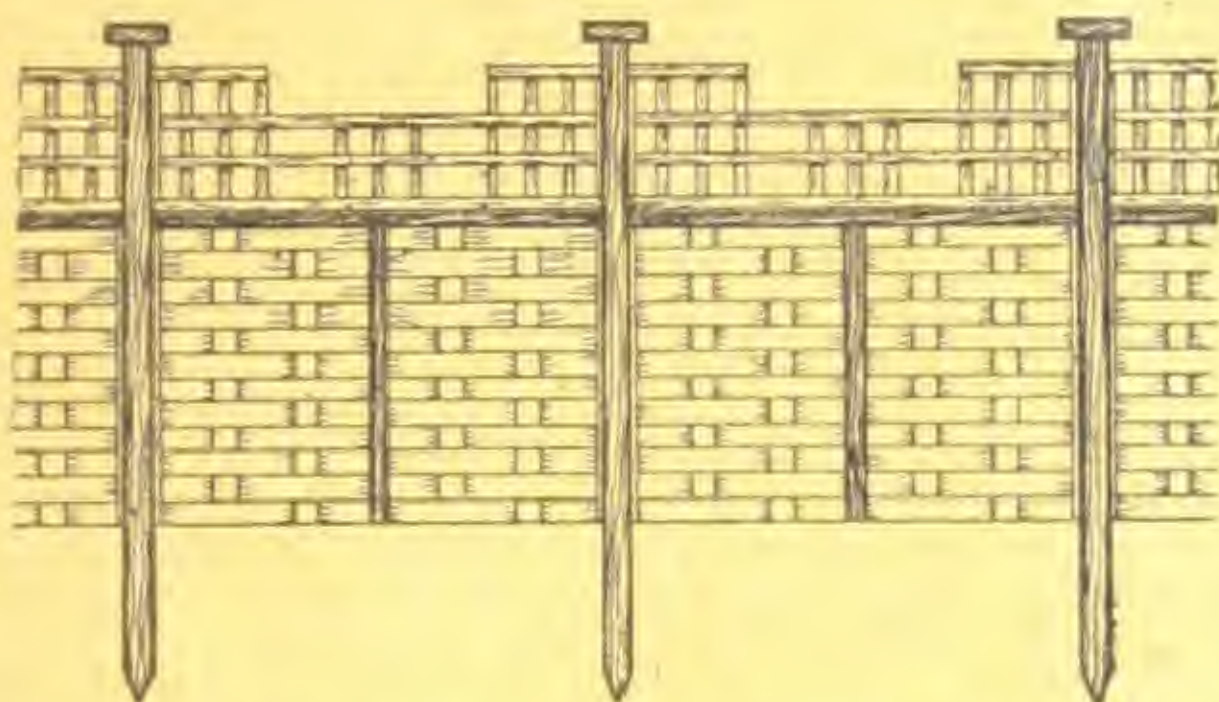

## INTERWOVEN FENCING with Square Trellis above.

A practical Fencing with Square Trellis for training purposes, etc.

The Trellis is framed at sides similarly to the **INTERWOVEN** Fencing, so that it may be fixed centrally between up-rights above the close fencing.

A flat top rail divides the two sections which are sent separately. All the material is **treated Wood Preservative** before being put together.

Fig. 22.

**EXACT LENGTH** can be supplied but odd inches should be reckoned as one foot

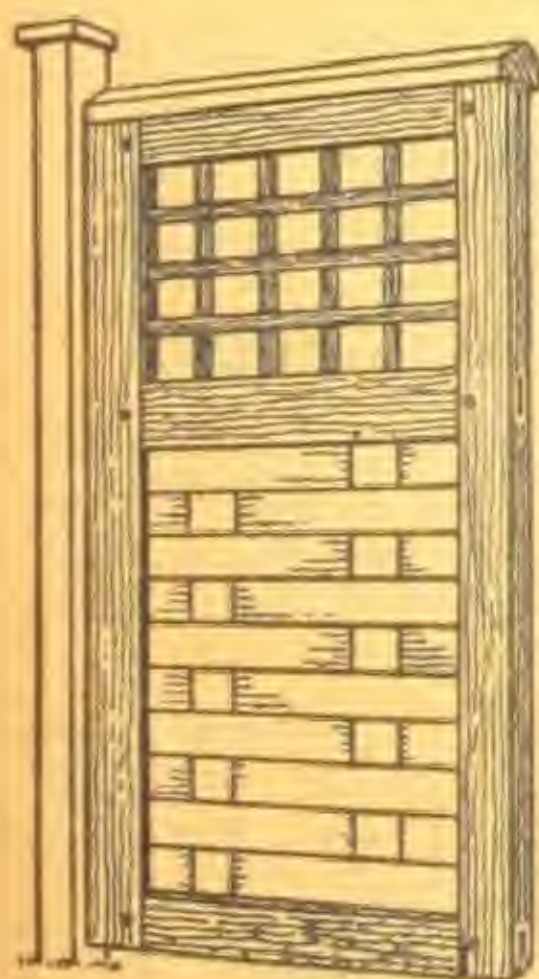

Prices include 2-in. by 2-in. **Oak Posts** or 3-in. by 2-in. **Larch Posts** as may be preferred at 6-ft. intervals.

				Posts	Per foot run
Overall height	4-ft. 6-in.	(3-ft. Woven, 1-ft. 6-in. Trellis)	7-ft.		2/2
"	5-ft. 6-in.	(4-ft. " 1-ft. 6-in. " )	8-ft.		2/6
"	6-ft.	(4-ft. " 2-ft. " )	8-ft. 6-in.		2/9
"	6-ft. 6-in.	(5-ft. " 1-ft. 6-in. " )	9-ft.		3/-

Where above is required for adding to height of existing fence, longer Posts can be provided and height of **Interwoven** can be varied as required.

(See Note re **EARTH PLATES** on page 33).

## GATES TO MATCH ABOVE.

Joiner made with substantial 4-in. by 1½-in. framing, mortised and braced. Trellis and **Interwoven** all centrally fixed and height to match fencing. Complete with strong hinges and Suffolk latch. Posts extra.

Height.	2-ft. 6-in. wide.	3-ft. wide.

## FRUIT STORE RACK

A useful Fruit Store. Tray Splines are rounded on edges. The Back is strongly braced with five battens screwed to corner posts. Made in one size only, with 10 Trays.

3 ft. 9 in. by 19 in. deep by 2 ft. wide

Price 28/9 Carriage Paid Station England and Wales.

## GALVANIZED WIRE PEA GUARDS, 3-in. Mesh.

36-in. long, 6-in. high, 6-in. wide with two ends to each dozen. Packed flat.

1 doz. 3/9 2 doz. 7/-

3 " 10/6 4 " 13/6

6 " 19/6 12 " 37/6

Carriage Paid. Extra Ends 2d.

## PEA AND BEAN SUPPORTS.

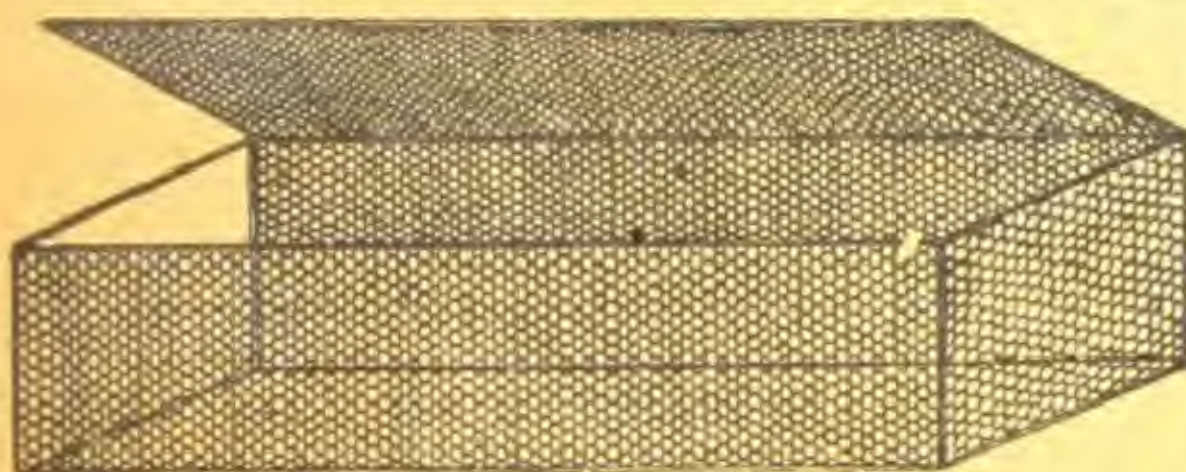

18-ft. wide by 6-ft. or 7-ft. high. Steel Uprights and 9-ft. long Top Rods, complete with 5-in. square Mesh. Heavy Tarred String Netting. Rigid and Upright without Stays.

Occupy but small space and last year after year. Especially suitable for Sweet Peas, and although initial outlay is rather higher, ultimate cost is much less than sticks.

Prices complete with 3 Steel Uprights and two 9-ft. Top Rods and the Square Mesh Net. 18-ft. by 6-ft., 13/3; 18-ft. by 7-ft., 14/3, Carriage Paid.

Nets only, 3/-, 3/3 respectively, Carriage Paid.

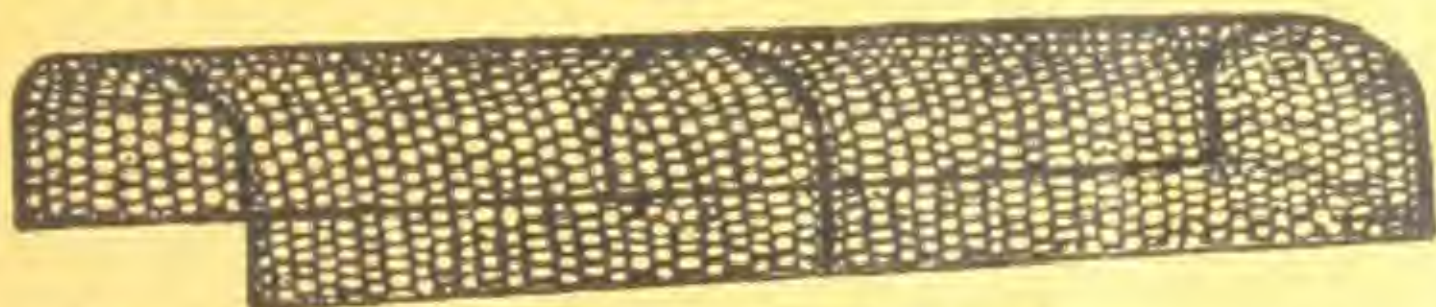

## STRAWBERRY OR PLANT GUARD WITH ROD.

Folds flat when not in use. 6-ft. long, 2-ft. wide, 15-in. high, 1/2-in. mesh. Useful not only for Strawberries, but for other plants and seedlings. Can be made frost proof by covering with scrim or straw. Price without ends, 6/9 each. Ends, 1/2 each. Rods for securing to ground included.

## STRAWBERRY PROTECTOR.

With elliptic top. Made of galvanized wire netting, 1/2-in. mesh. Including 2 ends to each dozen, 72-in. long by 18-in. wide by 9-in. high, 2/6 each. Extra ends for same, -/5 each.

## NETTING AND SCREEN SUPPORTS.

For rapid and effective protection of Seed and Strawberry Beds.

Fixed in half the time taken by other methods. Most economical. Last for many years. Occupy little space when stored away. Saves Netting from damage as it is kept securely in place by top lugs, which also hold Extension Canes when used for large beds.

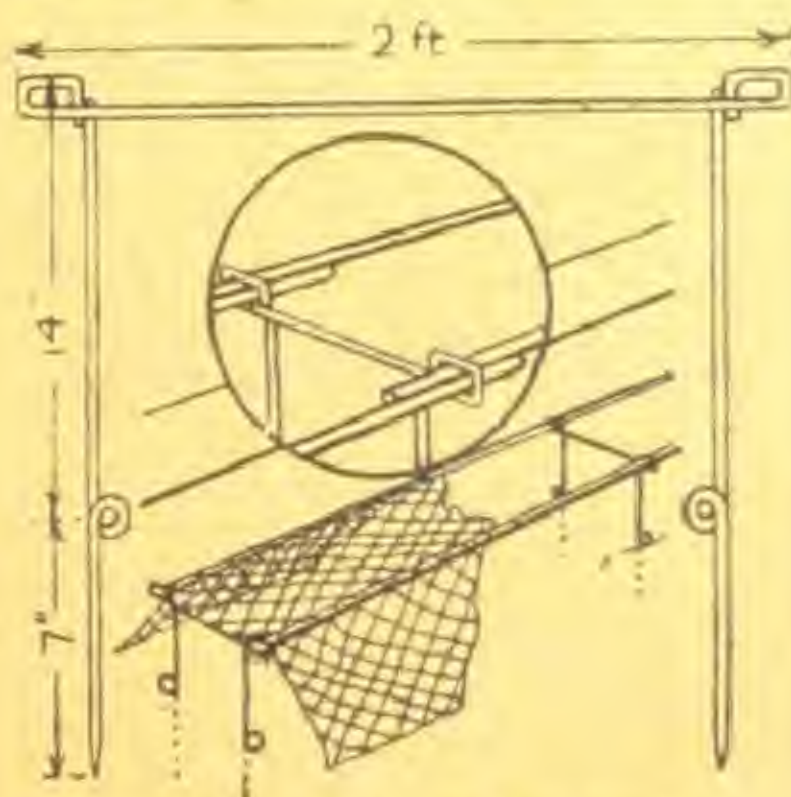

Adaptable for any size or shape of bed.

One dozen supports is sufficient for bed 66-ft. by 2-ft. or 30-ft. by 6-ft.

14-in. above ground, 8/- doz.

20-in. above ground, 12/- doz.

**BAMBOO CANES** for use with these supports, see page 24.

Ask for particulars of Cotton Spreading Apparatus for Fruit Protection.

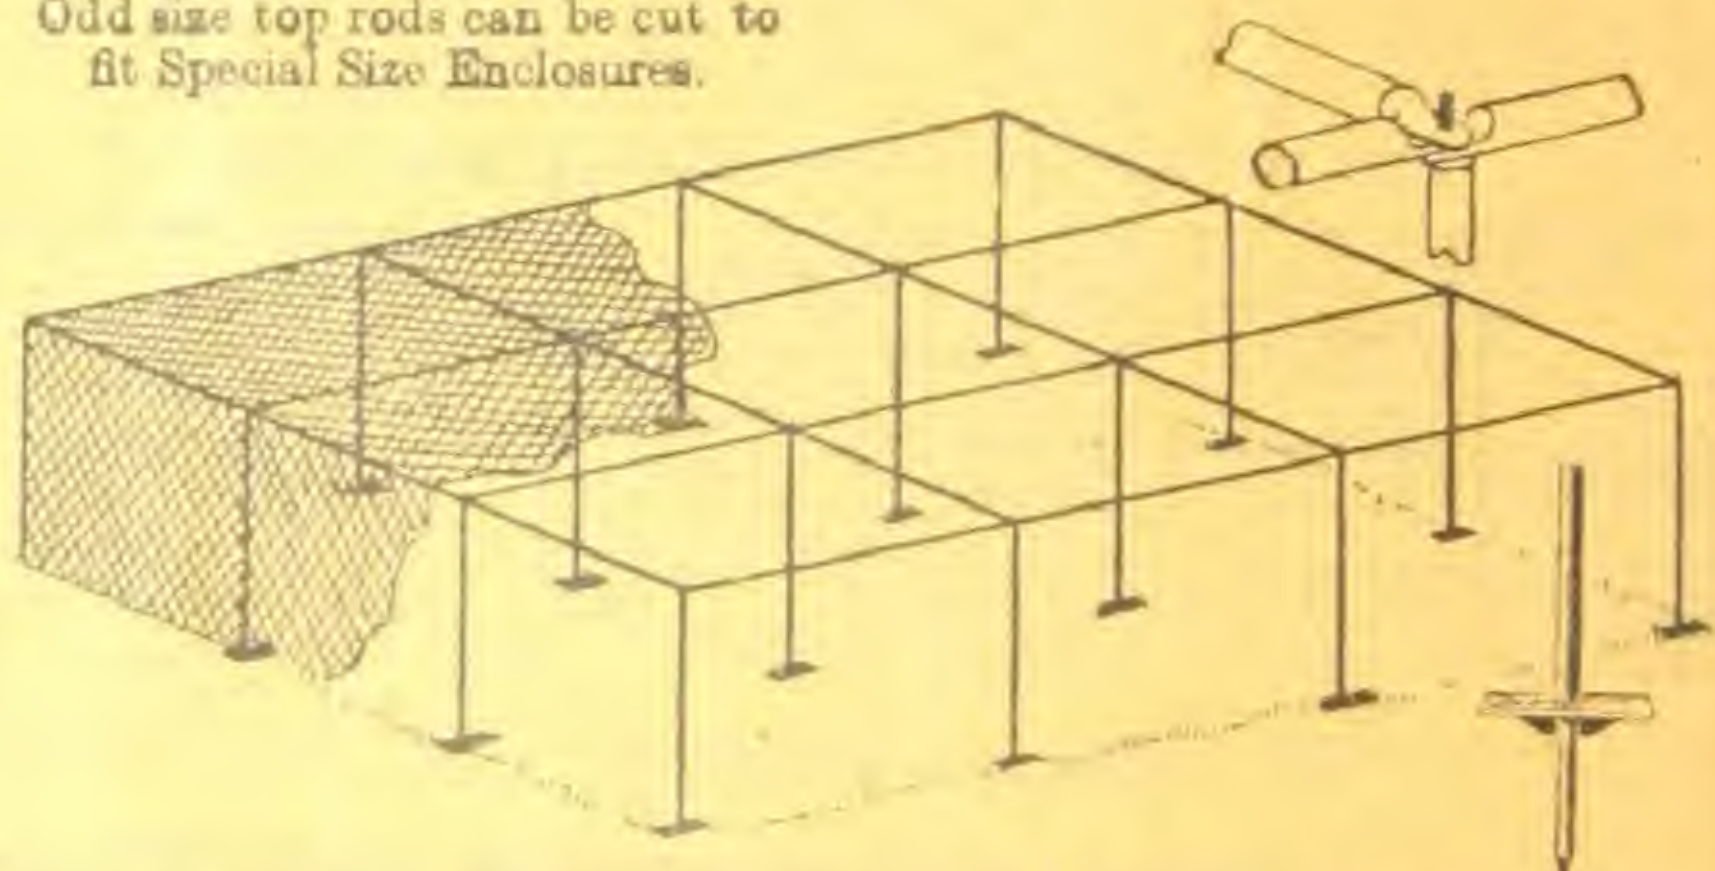

## FRUIT ENCLOSURES.

The most simple and effective method of erecting a **FRUIT ENCLOSURE**. By using the Steel Uprights and Top Rods as illustrated, erection is simplicity itself and the combination of Top Rod and Earth Plate eliminates all Stay Wires or Guys. Makes the hanging and removing of Netting, either Wire or String, a quick and easy job.

Particulars of Wire Netting will be found on Page 34.

Particulars of String Netting will be found on Page 31. The New Square Mesh is particularly recommended.

Odd size top rods can be cut to fit Special Size Enclosures.

Example: An enclosure 18-ft. by 18-ft. takes 9 Standards and 12 Top Rods, or as illustrated, 27-ft. by 27-ft. takes 16 Standards and 24 Top Rods

**STEEL UPRIGHTS.** Painted Green.

	6-ft.	7-ft.	8-ft. out of ground
Ex. Strong Tubular Welded ...	2/2	2/4	2/6 each
Medium Tubular ...	2/-	2/2	2/5 ..

**TUBULAR STEEL TOP RODS.** 9-ft. long, Painted Green with Galvanized Hooks.

Ex. Strong Quality, 1/4 each.

**Stout Ground Pegs.**  8 1/2-in. long.

Galvanized Iron, for fixing netting to ground, 1/3 per doz.

### GATES for above.

Well braced Wood Gate Frames, covered with Galvanized Wire Netting, complete with two Oak Gate Posts, 2-in. by 2-in. thickness, and hinges.

Size 6-ft. by 2-ft. wide	...	...	14/6
„ 7-ft. by 2-ft. „	...	...	16/6

## New Tanned String Netting. Square Mesh.

(Not suitable for Tennis Surrounds. See page 155.)

Whilst more expensive than the ordinary Tanned String Netting (repaired fish nets) it is more sightly, easier to put up and covers the **actual size** stated.

Made in 1-in. mesh from stout Cotton Twine and selvedged all round.  
Will keep out the smallest birds.

Stocked	1 yd.	2 yds.	3 yds.	4 yds.	Wide.
Medium ...	5½d.	10½d.	1/3½	1/8½	per yd. run
Heavy ...	6½d.	1/0½d.	1/6½	2/-	"

Any length supplied in above widths.

Above can also be **Steam Tarred** in addition for 1/- per 50 square yards with a minimum charge of 1/-. This greatly adds to its life.

Postage, 6d. extra on orders of less than 20/-.

## Sweet Pea Nets.

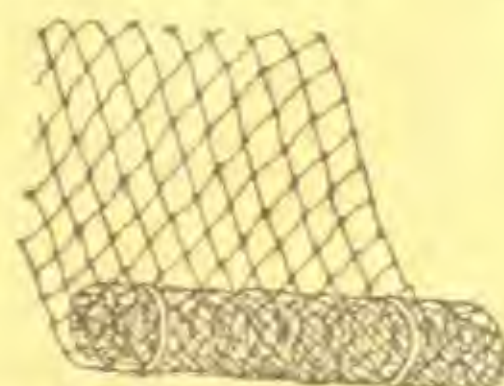

Stout string, 5-in. square mesh, steam tarred, selvedged all round.  
Stock sizes, 18-ft. by 6-ft., 3/-; 18 ft. by 7 ft., 3/3, Carriage Paid. Special sizes made to order, 3d. per square yard.

**Diamond Mesh.** Repaired Netting Corded all round to cover area 30-ft. by 9-ft. 5/6 Carriage Paid.

## Tanned String Netting.

### Diamond Mesh

Fully Repaired **Fish Netting.**

Special Note.—Being **Diamond** mesh a third more should always be allowed above the surface measurement. The netting shrinks one-third of its strained length on its being expanded to its specified width, and this rule applies to all diamond mesh netting. Thus a net 50 yards long will only cover about 33 yards when expanded to its correct width.

"	"	845	"	1/11	"

### EARTH PLATES FOR WOOD POSTS.

Where the soil is sandy or is damp clay, the uprights are liable to move in heavy wind. The Earth Plates are recommended in such cases and by nailing same to posts below ground level, greater rigidity is obtained.

Supplied in 8-in. x 4-in. x ½-in. thick @ 1/6 per dozen.

**SUGGESTIONS :** 1/2-in. mesh for keeping out rats.  
 3/4-in. mesh for keeping out sparrows and for fruit enclosures.  
 1-in. mesh for chicken runs.  
 1 1/4-in. mesh for rabbits, tennis enclosures, poultry.  
 2-in. mesh for poultry and general utility purposes.  
 It costs as much to erect thin gauge as heavy gauge Netting.  
 The heavy gauges are cheapest in the end.

**PATENT WIRE NETTING STAKES OR STANDARDS.**

Unique in its simplicity, convenience and effectiveness.

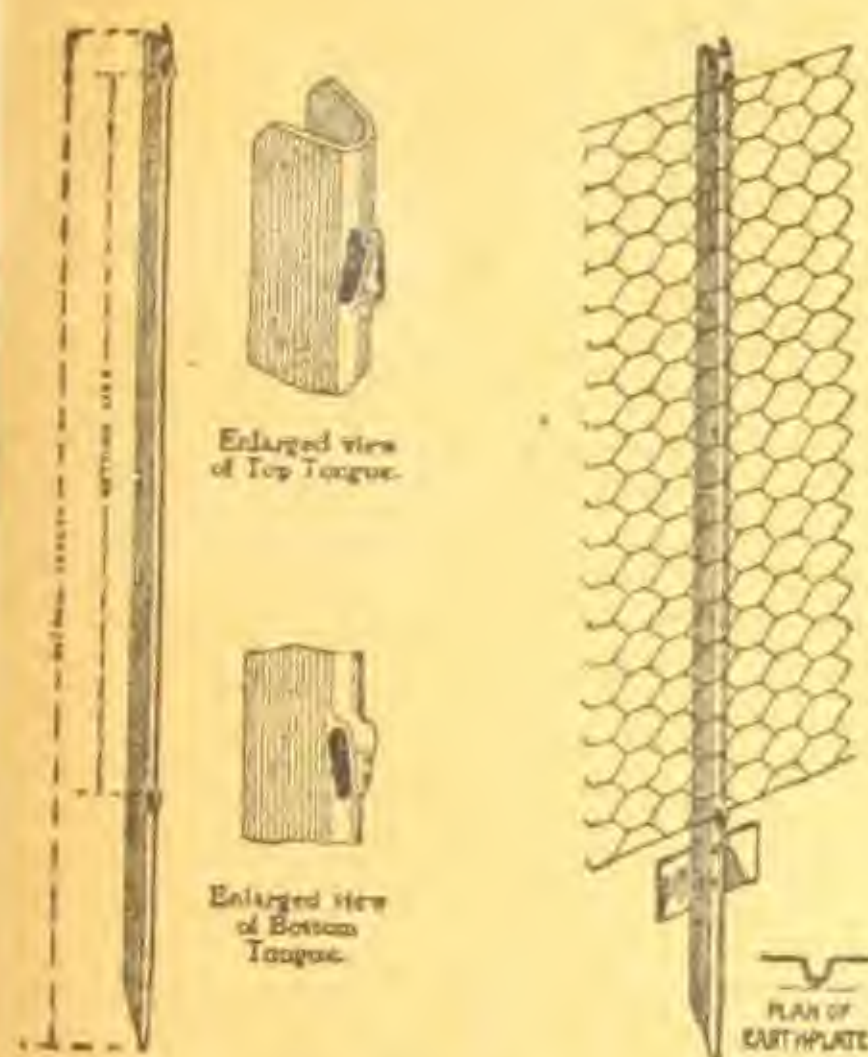

Constructed of a special section of tough steel having great resisting qualities and which gives a specially firm grip of the ground when driven in.

Two tongues are pressed from the solid metal—

The lower tongue engages the bottom selvage of the wire netting, whilst the top selvage of the netting is slipped over and into the upper tongue.

Painted two coats Rust Destroying Black Enamel Paint before leaving Works.

## Galvanised Chain Link Fencing

### FOR ALL PURPOSES.

Since its introduction, the demand for this type of fencing has continually grown. Chain Link Fencing is **absolutely rigid** when erected and is the strongest type of fencing known. It **does not bulge**, however, and lasts years longer than wire netting. It cannot be compared for appearance.

Chain Link Fencings can be **erected without** showing a single join, however long the fence. Simply open the top and bottom loops, twist the end wire out. Then spiral back again into the two loose ends and clench the loops. The illustration **clearly shows** the method. 

**ERECTION** is simple and easy. **No straining tools or expert labour** necessary. Posts are erected first. Top and bottom wires then stretched taut from end to end. Place the fencing stretched hand tight either attaching to straining wires by means of binding wires or by opening looped knuckles at intervals, reclosing over the straining wires. Top and bottom wires for low fencing and when higher than 4-ft. centre wires as well are supplied. **Uprights** should be used about 8-ft. apart, and these are shown in the following pages. Hardwood posts as shown on pages 18 and 19 can, however, be used up to 8-ft. high fencing. Particulars of this fencing above 6 ft. high for Tennis surrounds, etc., are shown in the Tennis section of the Catalogue.

**STRAINING END POSTS** (see page 38) with 1 staybar and **Corner Post** with double staybars, etc., complete with straining screws, can be used where required, and these, of course, provide very firm anchorage for straining the line wires.

The **following page** indicates the various sizes and prices.

For aviaries and chicken enclosures. For machine and window guards .....	Use $\frac{1}{2}$ in., $\frac{3}{4}$ -in. or 1-in. mesh.
For rabbit fences, runs for small dogs, etc. ....	Use 1 $\frac{1}{4}$ -in. or 1 $\frac{3}{4}$ -in. mesh.
For lawn tennis enclosures .....	Use 1 $\frac{3}{4}$ -in. or 2-in. mesh.
For poultry enclosures, dog runs, etc. ....	Use 2-in., 2 $\frac{1}{2}$ -in. or 3-in. mesh.
For division or boundary fences .....	Use 2-in. to 5-in. mesh.
For pig and cattle and general field fences .....	Use 3-in. to 5 in. mesh.

## British Made Galvanised Chain Link Fencing.

**ALL PRICES** per roll of 25 yds., including **LINE WIRES**.

Carriage Paid to Station, England and Wales.

**ESSANEE " SPECIAL WIRE FENCING.**

Standards are constructed of a special section of tough steel having great resisting properties, and which gives a specially firm grip of the ground when driven in. The wires are attached to standards by special tongues pressed from the solid metal, and after wires are inserted in the tongue a light tap with a hammer will close same. To remove wire, the tongue can be readily re-opened and closed again as required.

Painted two coats **Rust-Destroying Black Enamel.**

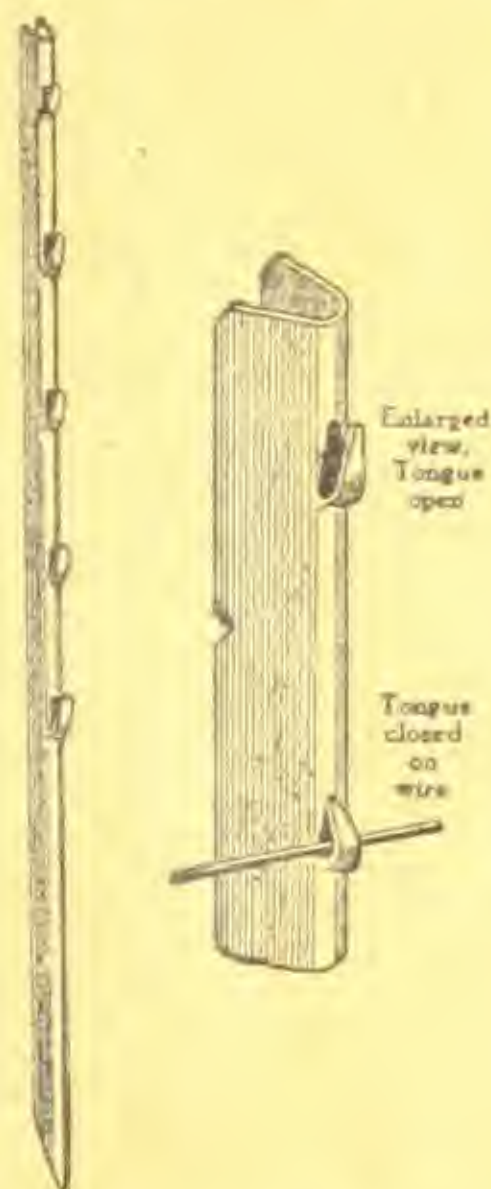

Standards are 5 ft. 6 in. long, making a 4-ft. Fence, and prices **include** all necessary 12-Gauge Galvanised Wire for five lines. See page 43 for wire gauge chart.

**Can be also supplied 5-ft. high, 6 wires, at 5/- per 100-ft. of Fencing extra on prices below. "U" Section only.**

Any length of Fencing can be supplied at *pro rata* prices. If 10-G. Wire 2/- extra per 100-ft. of Fencing.

If 8-G. Wire 4/6 " " "

Either type supplied to order with the Stakes **Galvanised** after made at an extra of 33½ per cent.

1,000 ft. Fencing, consisting of 100 Stakes and 5,000 ft. of 12-G. Wire	Prices using "U" section Stakes.	Can also be supplied using 1½-in. x 1½-in. Angle Iron stakes as follows

### THE TOWNSEND WIRE STRETCHER

is made with a wooden lever, or handle, 3-ft. in length, to which is attached malleable iron pincers, into which are riveted serrated steel grips; warranted not to slip. It is a substantial and very durable implement.

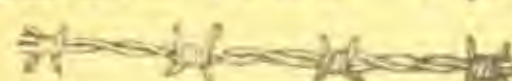

**Advantages.**—The ease with which it is attached to the wire, the rapidity with which the wire is brought into position for fixing. One man stretching the wire can nail it to the post from which he is stretching without assistance. Price Complete, 12/6. Carriage Paid. Particulars of other Strainers and Holdfasts, etc., page 27.

Mower Complete	...	17/-	18/-	19/-	20/-
Grass Boxes	...	4/-	4/3	4/6	4/9

All above F.O.R.

### Slatters Patent Front Runner.

For Trimming Narrow Grass Borders and Edges. Can be fitted to any side wheel Machine. A most useful attachment, enabling a Lawn Mower to be used for cutting quite up to the edges of lawns and for cutting narrow grass borders. Simple to attach, and can be adjusted to any height. Price 7/6 each, Carriage Paid.

### COMBINATION GRASS EDGE TRIMMER AND CUTTER.

A Lawn Edge is worthy of careful attention. It should be cut to shape when the ground is moist and should then be trimmed periodically. Aim at having fine grass right up to a clean true edge. Coarse, outgrowing grass and weeds should not be trimmed; they are a disfigurement and must be pulled out whenever they appear.

This article is specially designed to meet the evident want of a light machine that will rapidly perform the irksome operations of trimming and cutting the ragged edges of Lawns. Also extremely useful for cutting turves preparatory to lifting. Grass Trimmer and Cutter, 32/6.

Turf Cutter only, 23/6.

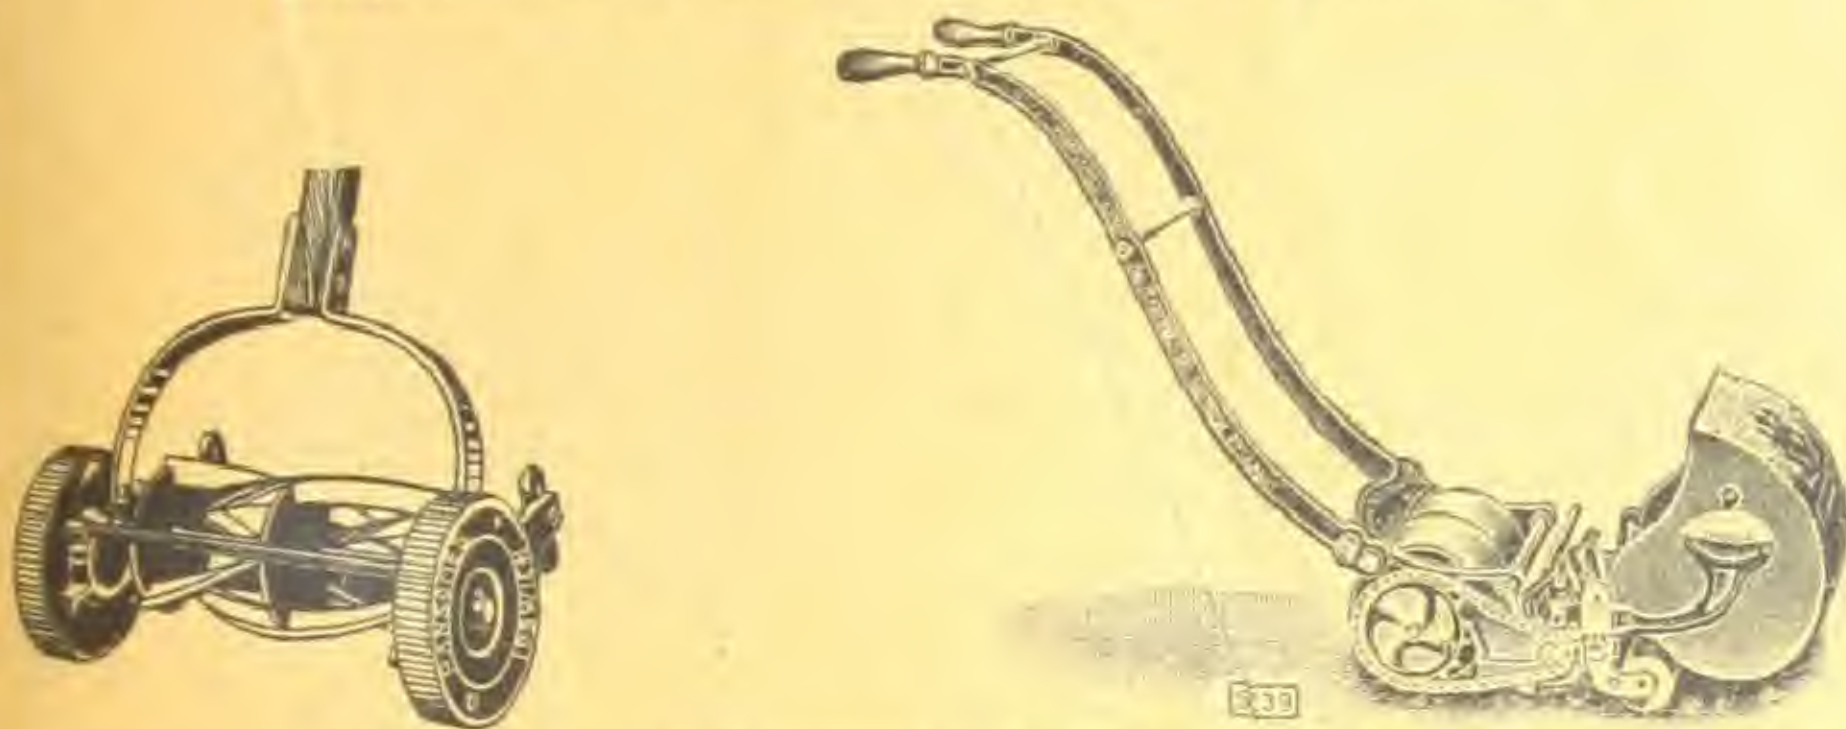

Carriage and Packing, 1/3 extra.

## LAWN MOWERS.

The following are the **Cash Prices** of the Standard Makes.  
Comprehensive booklet of any make sent on application.

## RANSOMES' MOWERS.

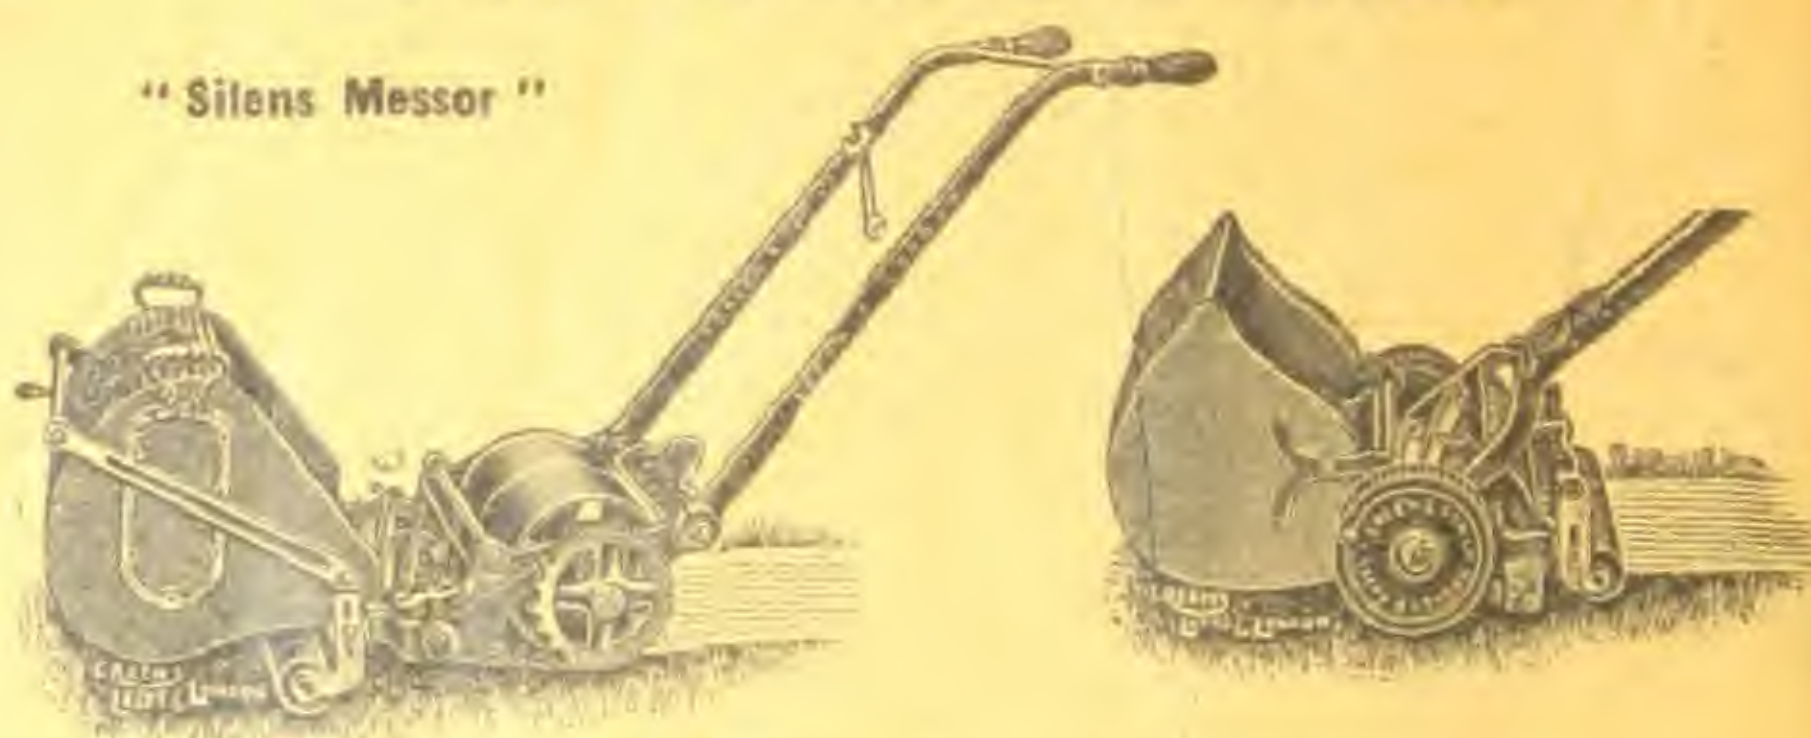

- Ransomes' "Cub."** Side Wheel. Five bladed.

## LAWN MOWERS—continued.

### WEBB'S MOWERS

Although low in price, the specification gives a maximum of efficiency. **Six-blade Cutters**, Sheffield steel. Chain drive, totally enclosed. Adjustable handles. Easy adjustment.

The Webb "Whippet," 10-in. 45/-

The Webb "Wasp," 12-in. 47/-

Complete with Grass Box.

#### The Webb "Witch."

Precision built Roller Mower, Ball bearing. Easy hand adjustments. **Six-bladed Cutter**. Totally enclosed Chain Drive. A first class Mower at a Moderate Price.

12-in. Size only. 70/- Complete with Grass Box.

**The Webb "Windsor."** Standard Roller Gear Driven. Eight-bladed. Ball-bearing. Easy hand adjustment. A high grade Mower.

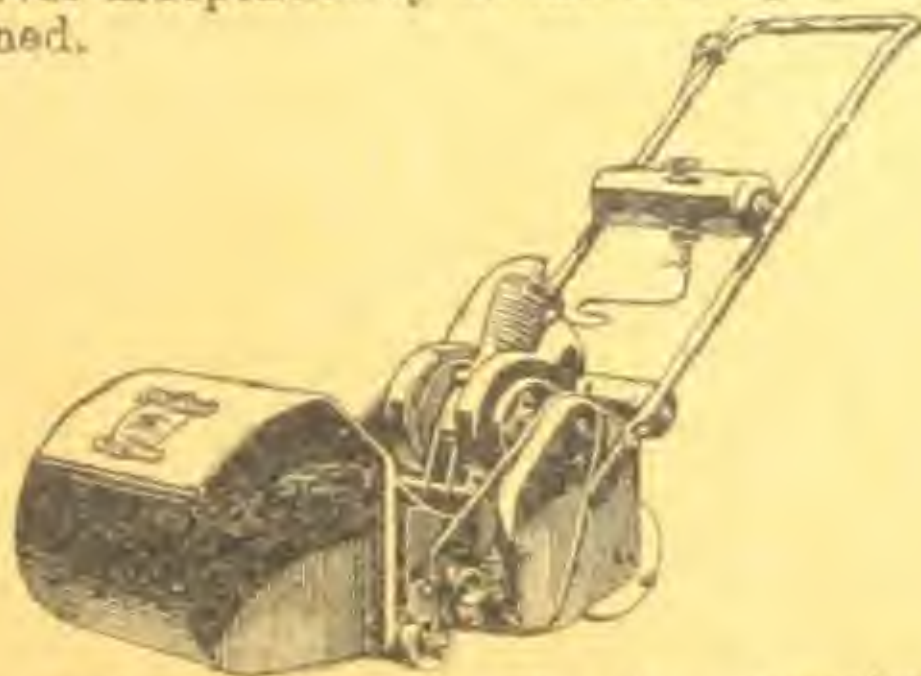

12-in., 104/6; 14-in., 119/6, including Boxes and Grease Gun for lubrication.

### ROYAL ENFIELD MOTOR MOWERS.

12-in. Light Weight Mower with **CUTTERS ONLY** Motor Driven. A New Design with many Novel Features.

This model is specially designed for cutting small lawns and grass borders, and is particularly suited for cutting round flower beds and trees. The machine is propelled by hand, but as the roller is mounted on ball-bearings it is exceptionally easy to push, even on sloped or when cutting long grass. The engine drives the cutting cylinder and thus does all the hard work. As the machine moves independently of the cutting cylinder the very finest finish can be obtained.

Engine: Bore and stroke 49 m/m. by 52 m/m., capacity 98 c.c. developing approximately 2 horse power. Transmission through flexible coupling to roller chain enclosed in quickly detachable cover. Freewheel incorporated so that cutters can be turned for cleaning without danger of starting the engine. Cash Price £12 12s.

## Water Ballast Rollers.

### Roller Bearing.

These Rollers are practically indestructible as the cylinders are of a special close grain **cast iron** and are not thin sheet metal. You have either **light or heavy** implement at pleasure: **light** when ground is soft and very **heavy** for dry weather.

## Tennis and Sports Ground Rollers.

"The Harcourt" For all types of Hard Tennis Courts it is essential that the surface of the Roller shall be absolutely "**true**," so that there shall be no possibility of marking the Court.

The "Harcourt" Roller is especially designed for this work, the face of the roller is turned in a lathe to ensure an absolutely smooth and true surface.

The Double Cylinders are bored and inner edges faced.

### "Premier" Roller-Bearing Rollers

The chief cause of hard work in rolling—axle friction—has been eliminated in the "Premier" Garden Roller. In the place of plain bearings, roller bearings have been used, resulting in a smoothly running Roller that can be managed easily. The "Premier" Garden Roller represents the last word in Roller values: no other Roller at its price can offer all the following features of the "Premier":—

**Roller Bearings** (patent)—ensuring easy running.

**Cylinder Adjusting Device** (patent)—enables the two halves of the Roller to be set closely together when wear eventually takes place, and also prevents them springing apart when in use.

## Garden Refuse and Rubbish Destructors.

### "THE UNIVERSAL."

Will burn all kinds of refuse readily, owing to its practical shape creating a fierce draught.

Made of strong galvanised steel. Nothing to get out of order. Loose wrought iron grid provides air space and also clearance for ashes.

No.	Height	Dia.	Price
0	31-in.	18-in.	23/-
1	36-in.	21-in.	33/-
2	40-in.	24-in.	41/3

Carriage paid England and Wales.

### "THE MARS."

A well made galvanized steel burner. Perforated all round, also at bottom.

43-in. high overall.

19-in. diameter.

Burns all kinds of garden refuse.

Price 16/6.

Carriage paid.

### "THE LEADER."

Will really burn household and garden refuse down to ashes at one lighting owing to the "forced draught" principle—a patented idea—on which it is built.

Strongly and heavily built of sheet steel, galvanized.

Size 16-in. by 46-in. overall.

Chimney 14-in. by 4-in.

Price 21/- complete

Carriage Paid England and Wales

### "THE BRISTOL."

Illustration shows the general construction which provides for sufficient draught to quickly and readily burn up descriptions of refuse. This pattern has a loose inner lining of galvanized sheet metal casing. This adds greatly

the life of the destructor.

No.	Dia.	Height	Price
0679	17-in.	24-in.	38/-

No. 683. Extra heavy 1/2-in. thick plate. Large size, 36-in. by 52-in. high, 19

Carriage paid England and Wales.

## Refuse Destructors of Heavier Make.

### "Columbian"

Specially suitable for burning Garden Refuse.

Strongly made of **heavy Cast Iron**—in Sections for easy transport. Complete with 4-ft. Cast Iron Pipe and Cap.

No.	Height.	Diameter.	Price.
1 ...	29-in.	19½-in.	63/-
4 ...	29-in.	23-in.	73/6

Carriage Paid nearest Station.

### "Triangular."

Designed to deal with refuse from gardens, nurseries, stables, kennels, camps, houses, hospitals, hotels, factories, warehouses, shops, schools, railway stations, etc.

All kinds of refuse are burned as produced (so preventing putrefaction or possible dissemination of poisonous matter by flies), and the fine ash when sifted makes a valuable fertiliser for gardens or fields, particularly when green stuff or household refuse is burned.

Weed seeds are completely destroyed which is not the case with bonfire ash. The construction allows for transport in sections, and the re-erection is simple; an unskilled person can put a Destructor together in a few minutes. The tapered shape ensures steady feeding of the material; there is no "bridging" over the fire. By the downward projection of the chimney base into the Destructor, the smoke and fumes from freshly charged material are also forced down and through or over the hottest part of the fire, reducing smoke and smell to a minimum. Any outrush of smoke when charging is avoided, and the Destructor may be filled right to the top and left to burn without attention for hours at a time.

**GALVANIZED WIRE RAT TRAPS.**

Easily set and catches rats in numbers. The trap is baited at both ends.

Price 5/6 each.

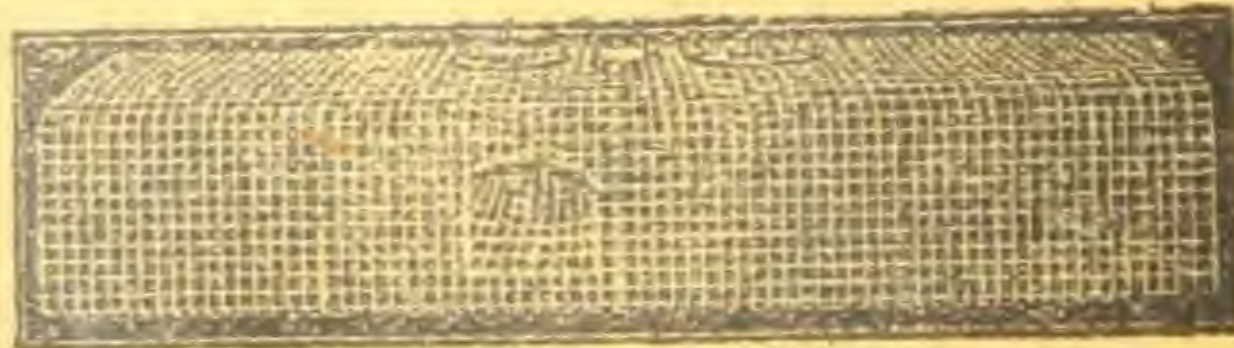

Carriage Paid.

**Nomorats**

**Nomorats** is a specific rat killer, inasmuch as, while being fatal to rodents, it is quite harmless to human beings, domestic animals and livestock.

One dose is sufficient; the rats eat **Nomorats** in preference to anything else, then rush out into the open and die. A trial will convince.

1/6 2/6 4/6 and 8/-  
-/4 -/5 -/6 and -/9 postage.  
Harmless to other animals.

10	"	"	...	...	3-ply	22/6
10A	"	"	...	...	3-ply	14/-

Nos. 3, 4 and 5 are special lines of light weight, but exceedingly satisfactory. Nos. 8, 9 and 10 are very excellent Felts for general use, and the length is 72-ft. We will gladly send sample pieces of all or any numbers on application.

## Improved Hot Air Hygienic Greenhouse Heaters.

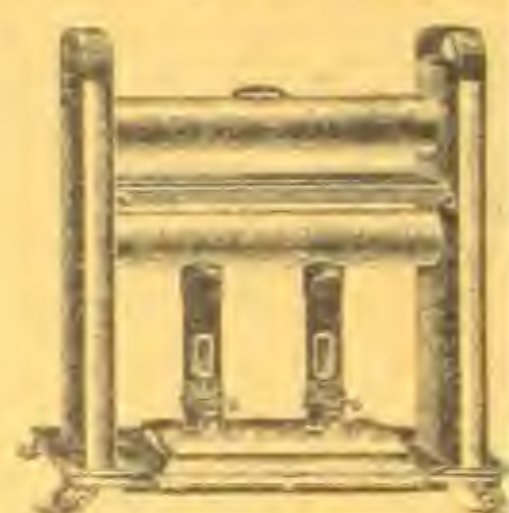

Oil Burning without Smoke or Smell by special arrangement of Flues

These Stoves are soundly constructed of Galvanized Steel throughout and are Portable and Complete. Being fitted with Metal Chimneys there is nothing to break. Simplicity and economical maintenance is the great feature

No. 44. One 1-in. Luminous Burner. Tank holds  $2\frac{1}{2}$  pints and burns 48 hours. Height 22 $\frac{1}{2}$ -in. by 23-in. wide. For 8-ft. by 5-ft. House. 18/-.

No. 45. One **Blue Flame** Burner. Tank holds 4 $\frac{1}{2}$  pints and burns 36 hours. Height 32 $\frac{1}{2}$ -in. by 29-in. wide. For 12-ft. by 7-ft. house. 45/-.

No. 46. Two **Blue Flame** Burners. Tank holds 8 $\frac{1}{2}$  pints and burns 36 hours. Height 31 $\frac{1}{2}$ -in. by 33-in. wide. For 20-ft. by 10-ft. house. 64/6.

## Hot Water and Hot Air Heater.

Copper throughout with iron supports and flue. **Blue Flame** Burner. Tank holds 3 $\frac{1}{2}$  pints and burns 30 hours. For house 12-ft. by 8-ft. 75/-.

## Steam Radiator for Greenhouses, Etc.

Burns 24 hours at one filling. Container holds 4 to 5 pints oil.

Height 23-in., Length 27-in., Width 15-in. For Greenhouse 16 ft. by 10 ft. From a relatively small and economical burner, a large and hot radiating surface is obtained. The shallowness of the tank permits water being rapidly boiled. Steam passes up the connecting tubes into large radiating cylinder. This cylinder quickly warms, repels and circulates the air throughout the house in a marvellous degree. Losing its heat by radiation, the steam is condensed and passes back, drop by drop, through the small central straw pipe into the water boiler below. Theoretically no water is lost—in practice, the water in the tank should be renewed once a week.

All parts with which steam and water come in contact are of **Copper**—the apparatus is therefore rust-proof. Supporting stand is of Wrought Iron Japanned Black, and can be readily dismantled for stowing away.

66/- each. Extra Wicks, -/7 each.

All above Packing Free and Carriage Paid nearest Station.

## CIRCULATING HOT WATER HEATERS.

No. 1.

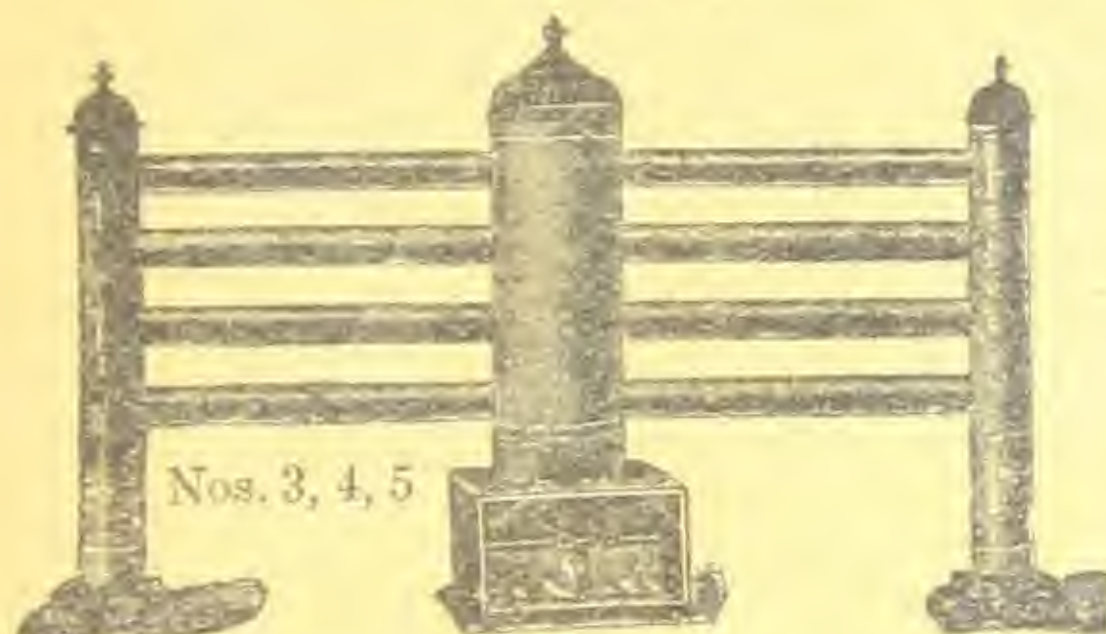

No. 2.

A great aid to healthy  
plant life.

Many satisfied users.

All fumes purified  
and condensed.

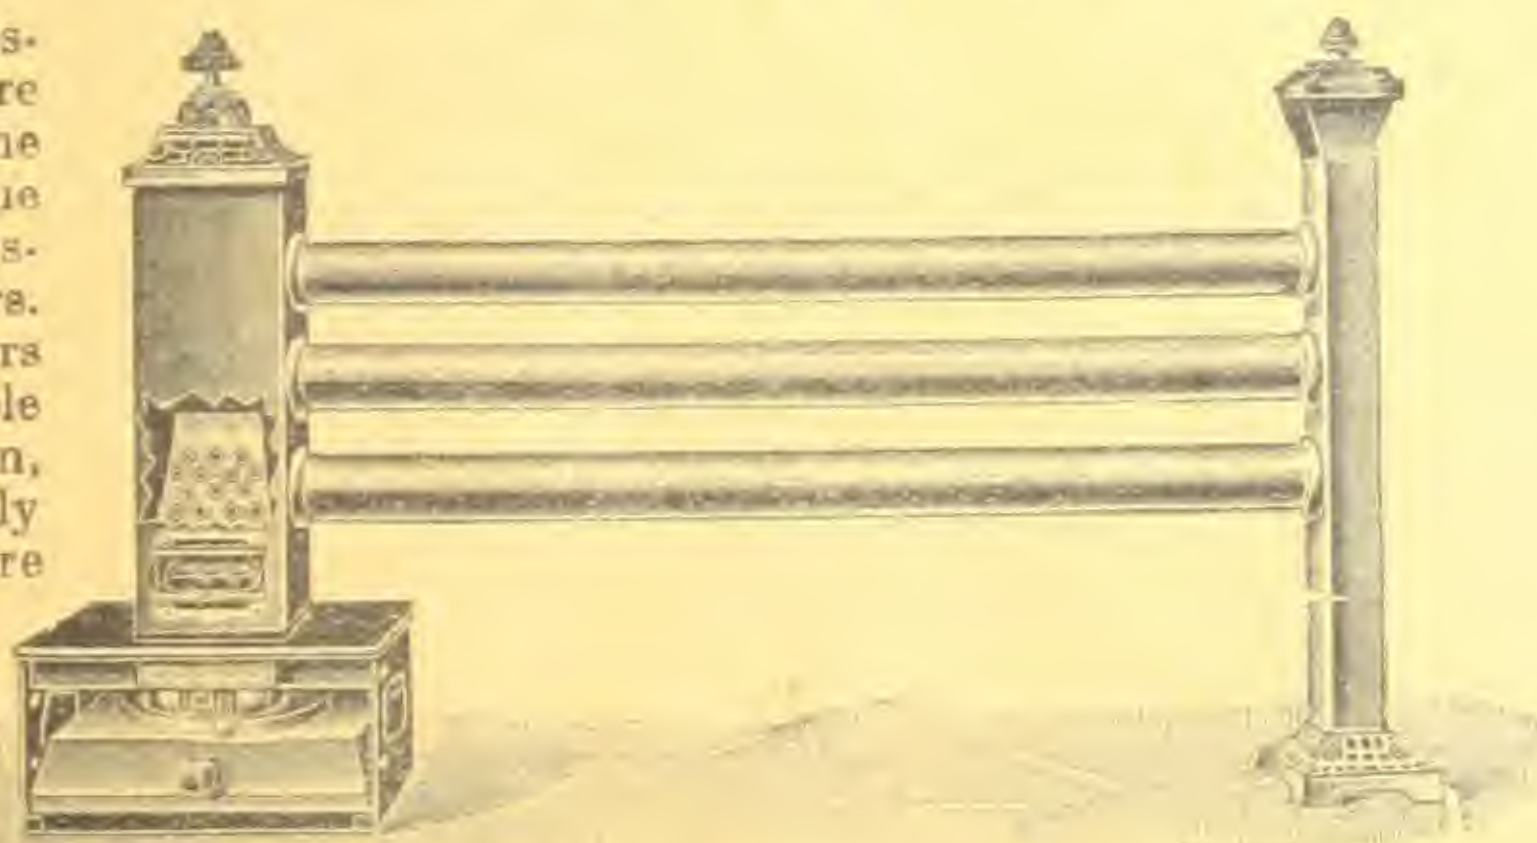

Galvanized Pipes, entirely  
Rustproof.

Nos. 3, 4, 5

No.	Pipes	Length	For Greenhouse	Container holds	Oil used per 12 hours	Price
1	2	30 in.	8 ft. by 5 ft.	2½ pints	¾ pints	13/6

16-ft. x 6-ft.	8 "	£11 0 0
20-ft. x 6-ft.	10 "	£13 15 0

## "SUNRALITE" GLASS SUBSTITUTE.

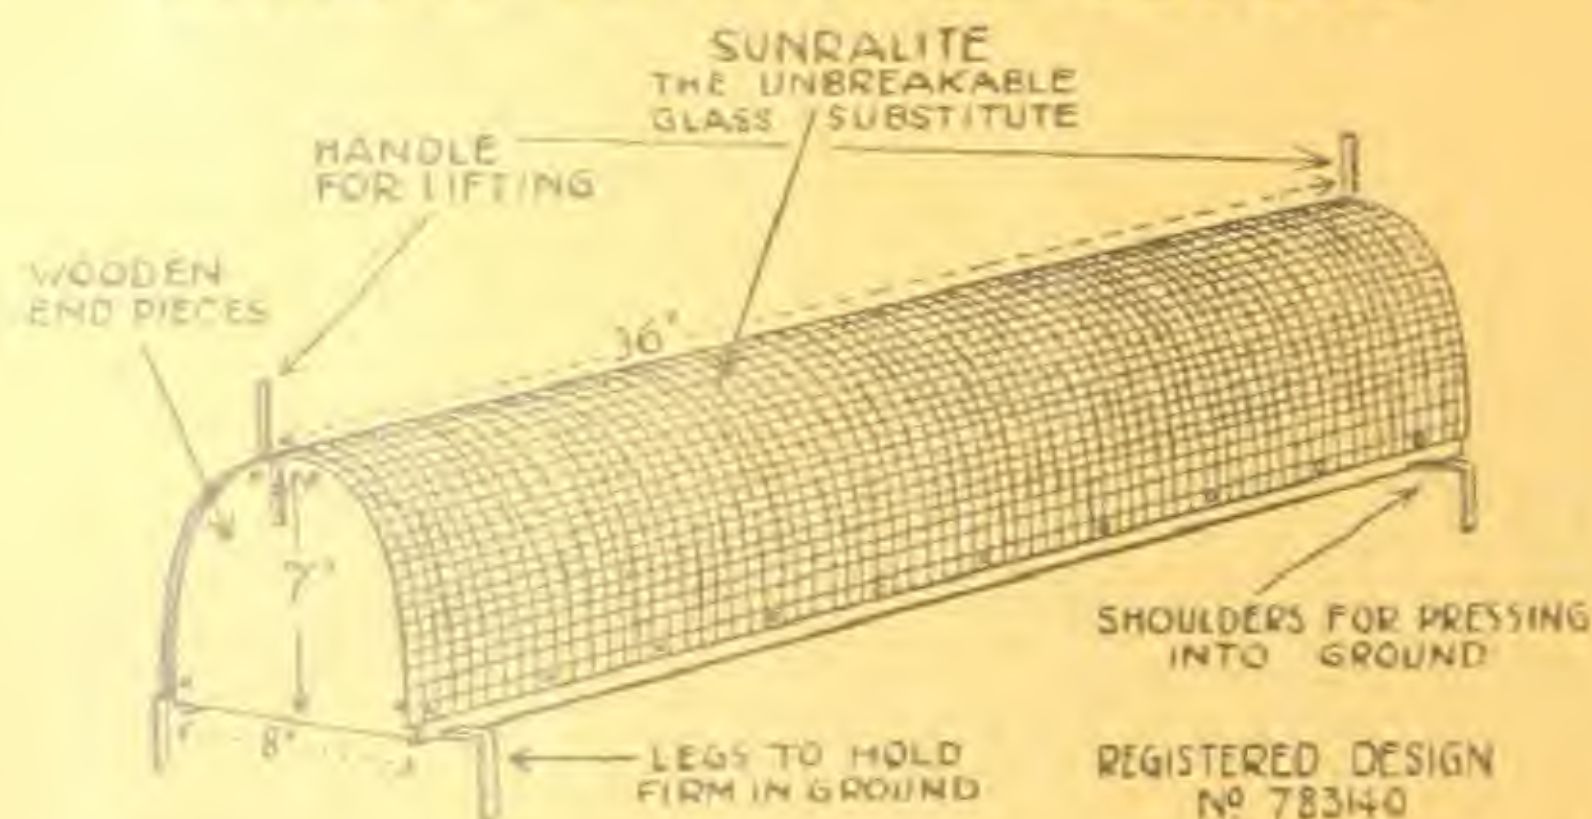

Supersedes glass for all garden uses. Light, unbreakable, and can be cut to shape with a pair of scissors. Passes the powerful health-giving **ultra-violet rays** which glass shuts out. The ideal material for forcing frames, etc., easily fixed in wood or metal frames and requires no skilled labour.

Any length supplied in 36-in. wide material at 4/6 per yard.

Can also be supplied coloured **Blue** or **Amber** at 6/- per yard.

Carriage and packing -/6 extra, any quantity.

## SUNRALITE TUNNEL CLOCHE.

### AT LAST! THE IDEAL CLOCHE.

Affords the passage of unrestricted light, and, being made with **Sunralite**, the unbreakable British glass substitute, the cloche also passes the **ultra-violet rays**, that important part of light which glass shuts out; this has a most beneficial effect on all plants. Each cloche can be used singly if desired, the end pieces providing complete protection and retaining heat to the full. The cloches need not be lifted to water the plants under them, for any rain falling runs down the sides, soaks into the ground and goes to the roots of the plants—where it is wanted.

Five Sizes.		Length.	Height.	Width.	Price.
"Blackwall" Model	...	18-in.	4½-in.	6-in.	5/-

Tunnel Cloches Carriage Paid.

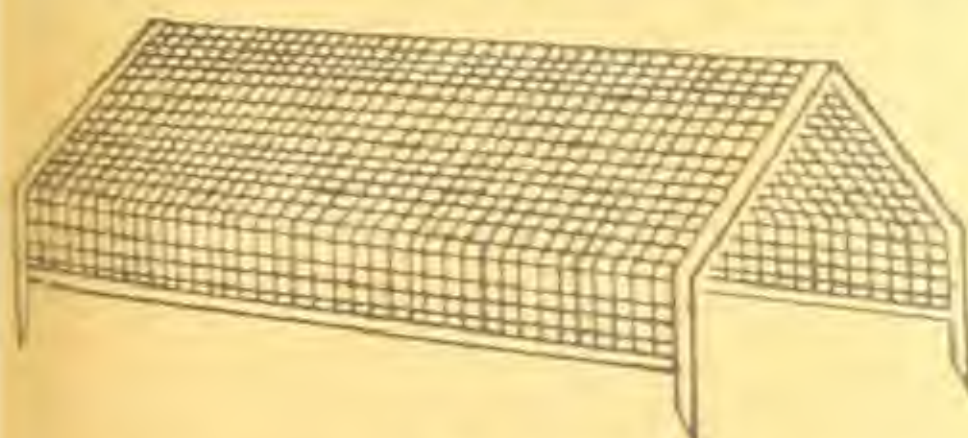

## SUNRALITE PLANT FORCERS.

The finest device made for raising all kinds of Seedlings.

LIGHT—UNBREAKABLE—HANDY.

Can be used either singly or continuously.

These wonderful new protectors are not merely wire frames, but are made with **Sunralite** the unbreakable British glass substitute. This material is weatherproof and passes the stimulating, health-giving ultra-violet rays which are so valuable to all living things. Ordinary glass shuts out these rays. The **Sunralite Plant Forcer** is more than a shield against the ravages of birds; it provides complete protection against frost, rain, hail and wind, it advances the growth of plants and strengthens them at all stages.

Carriage and Packing on 1 to 5 Forcers **9d.**, 6 or more Carriage Paid.

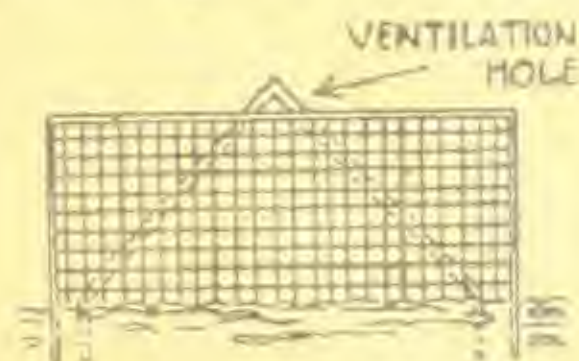

Type "C." Price **1/-**  
24-in. long, 2½-in. high, 5-in. wide.

## SEMI-ROTARY WING PUMPS.

**Double Acting.**

**All inside parts made of Brass**

Wing Pumps can be used for a large variety of purposes, and are much more satisfactory than single acting pumps, being **very compact, adaptable** and reliable. They are always supplied with counter flanges, screwed for iron gas pipe thread. When the suction lift exceeds 5 feet a foot valve should be used.

Fitted with Special Drip Preventor, Ball Valve Rose, Jet and Sprayer, complete with Bend and extra medium-sized Sprayer Nozzle.  
 Size—1-in by 14-in., 12/6; 1-in. by 20-in., 15/- and 1½-in. by 20-in. 21/- each.

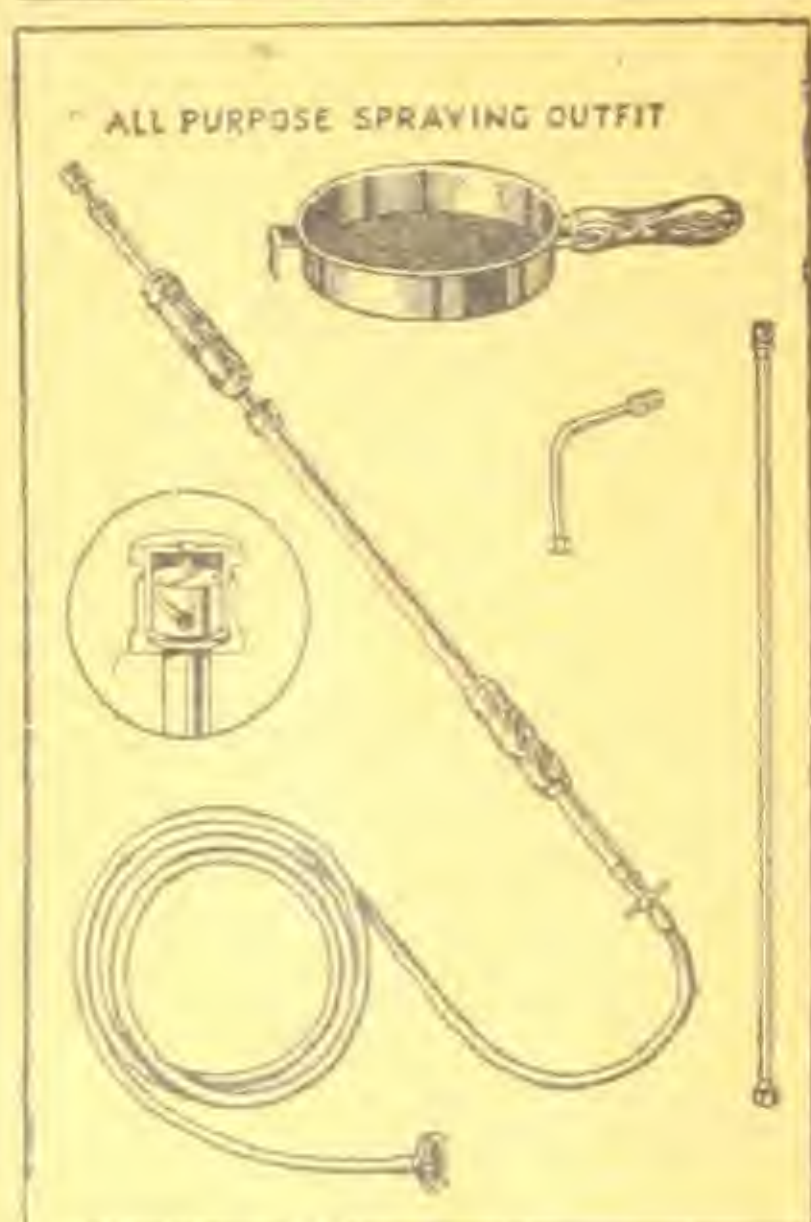

## SELF-SUPPLYING SPRAYING SYRINGE.

Efficient and easy to use, with nothing to get out of order. Strainer, which is at the end of 6-ft. of Rubber Hose, is placed in bucket containing the spraying mixture and after a few strokes with the Syringe, suction commences. Supplied complete and with Rose, Jet and Swivel Spray Nozzle. Can be used with or without the 15-in. Extension Branch Lance. 12/6.

(Carriage and Packing on any above 9d. extra, see page 1.)

## THE LADYWOOD SPRAYING OUTFIT.

No. 40.

The Ladywood Spraying Outfit will throw a solid stream of water 30 to 40-ft. high, and, if necessary, draw same through a Suction Hose over 200-ft. long, with a lift of 25-ft.

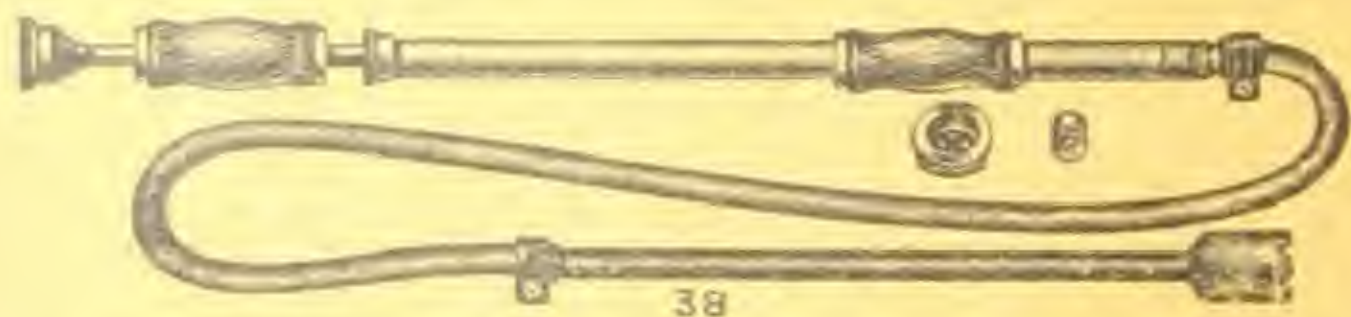

It is therefore most useful for cleaning high windows, spraying tall fruit trees, and washing motor cars, all of which necessitate a good pressure. It can also be used for limewashing and creosoting, disinfecting and general spraying purposes.

### Outfit Comprises :—

All brass double-action Spray Pump, polished and lacquered, giving continuous spray.

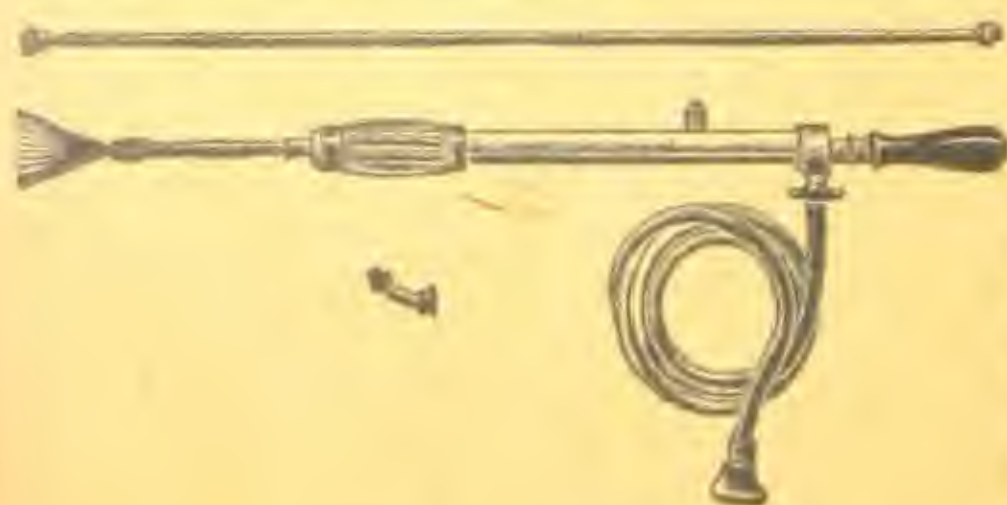

10-ft. of Hose, and Strainer, connected to pump by cap and lining. One unclogable needle Limewashing Nozzle and one spraying Nozzle, also Plain Jet; 2-ft. polished and lacquered Brass Lance, swivel connection angle bend. All metal strainer. 30/- complete as illustrated. Carriage 1/6

## Ladywood Spray Pump, No. 38.

This double action Pump is self-supplying and gives continuous spray. Will throw a solid stream of water 30 to 40-ft. It is the ideal, all-purpose Hand

Sprayer, its field of utility being practically unlimited. Most useful for spraying trees, vines, etc. The Pump is made of brass, with solid brass ball valves, complete with 3½-ft. of suction hose, and heavy iron strainer, that keeps the hose from jumping out of bucket or container. Three nozzles supplied with which the operator is able to get any variety of spray necessary. Price 25/-. Carriage and Packing 1/-.

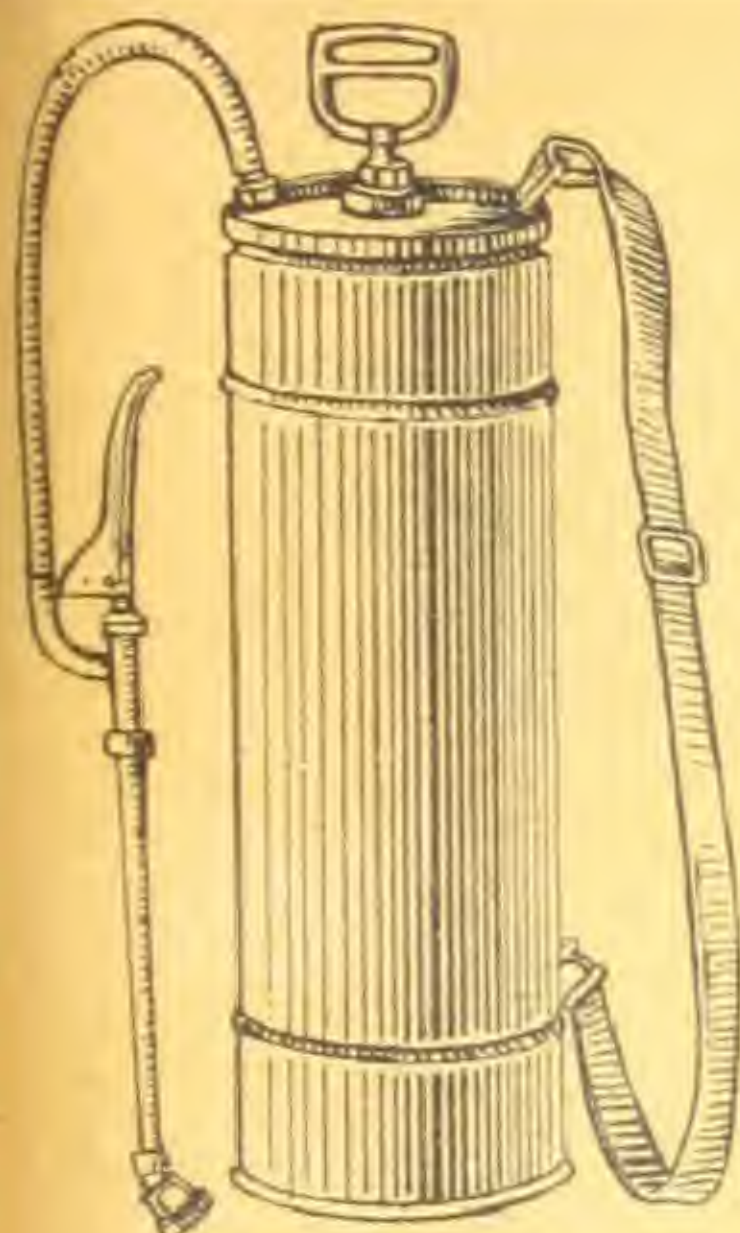

## The "Essanee" Sprayer

Embodies all that is desirable in a Seeding Spray Syringe. Simple, strong, beautifully finished with ebonite grip barrel. Complete with 6-ft. substantial rubber tubing, detachable bend, 2-brass lance, 2 spray jets as illustrated.

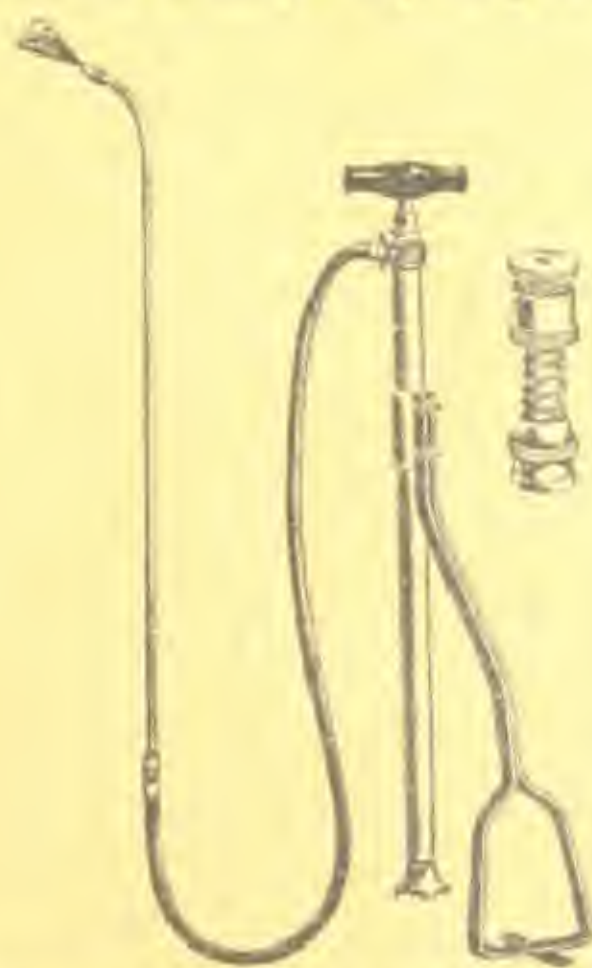

Single Action Pump ... 19/6 Carriage  
Double Action Pump ... 25/- Paid  
Special Limewash Nozzle, 3/- extra

**Knapsack Sprayer.****Pneumatic Garden Sprayers.****No Pumping required whilst Spraying.****Force of Spray can be regulated.**

A high pressure Compressed Air Sprayer of small capacity. Useful alike for garden and household use. Sprays all types of solution, but the brass tank is recommended for corrosives. Automatic shut-off nozzle. Each equipped with 40-in. of hose and a 6-in. lance as shown.

All above Carriage Paid Station, England and Wales.

## PINOLEUM SUN BLINDS.

**Pinoleum** is the most practical and economical of all blinds. Its uses are manifold, and although particularly suitable for **Windows** is eminently adaptable to **Balconies, Verandahs, Summer Houses, Greenhouses**, etc. The ease with which it can be fitted anywhere is one of its chief features.

Made from thin rods of wood woven together and painted green. Thus the material is rigid across the blind and flexible in the drop or length, which explains its practicability. Wood, which is not a conductor of heat, forms the basis of the composition of **Pinoleum**. The narrow spaces between the rods of wood allow the air to pass freely whilst the strong light and direct heat rays are broken. **Pinoleum** ensures a soft light and freshness.

**Pinoleum** being practically transparent, enables one to see outside without being seen. Sheltered behind a **Pinoleum Blind** an agreeable sensation of comfort and well-being is experienced during the hot weather.

Another advantage of **Pinoleum** is that it breaks the effect of the strong wind and keeps out the rain.

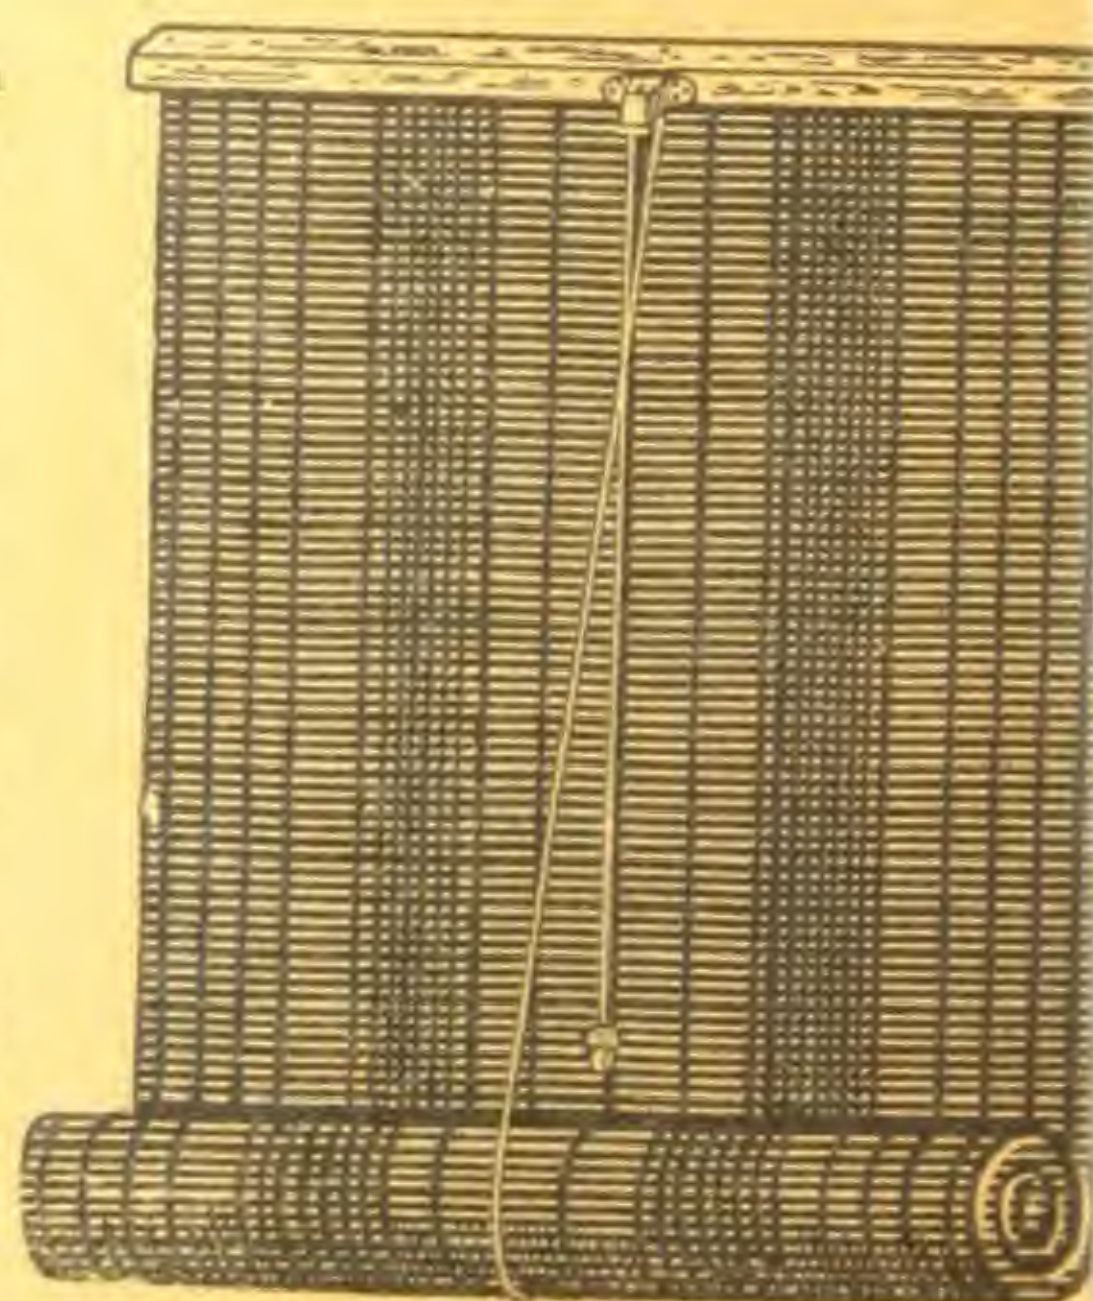

**Pinoleum** is practical because of its adaptability. The fitting and working of the blind is so simple. It can be fixed at a moment's notice to any window door or opening.

Stock sizes as under. All Blinds are complete with top rail, bottom roller pulleys and cord.

## PINOLEUM SUNBLINDS.

**PROJECTION IRONS AND SOCKETS** are supplied where required

to throw out Blind at bottom.

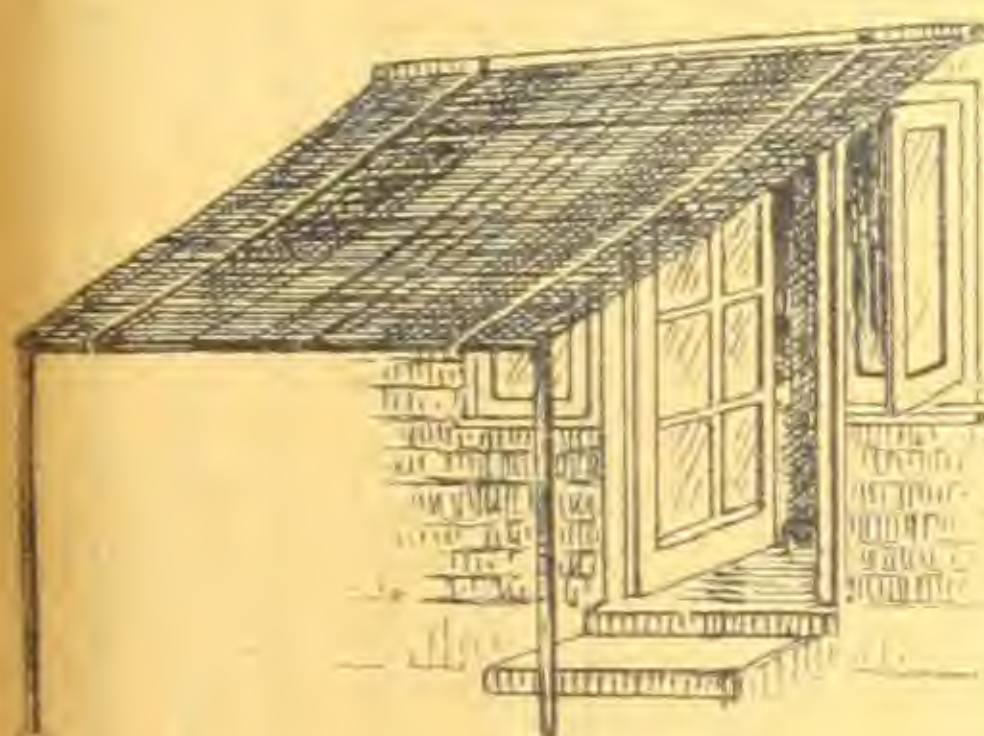

Length 12 15 18 21 24 in.

Per Pair 1/9 2/- 2/3 2/6 2/9

Length 27 30 36 42 48 in.

Per Pair 3/- 3/3 3/11 4/6 5/11

including sockets.

**AWNINGS** of all sizes can be erected easily. Sitting beneath **PINOLEUM AWNING**, which allows the sunlight and air to filter gently through, is the nearest approach to sitting beneath a shady tree giving perfect shade without closeness.

**PINOLEUM AWNINGS** are quite inexpensive, and our **advice** with estimate of cost will be sent upon receipt of **size required**.

**PINOLEUM** is in great demand for **Greenhouse Shading**. Can be used inside or outside as convenient. Economical and lasting. Gives perfect shade, but does **not exclude the air**. We shall be pleased to quote for your requirements upon receipt of details.

Other sizes can be made.

Awnings also supplied on  
Spring Rollers.

## Sun Awnings.

## A GARDEN SEAT OF DISTINCTION.

Made specially to our **OWN SPECIFICATION**, embodying all essential **LUXURY FEATURES** at a reasonable cost. Every constructional detail has been considered to give strength and durability. Workmanship and finish is of the highest class.

These Seats are **4-ft. 6-in. long** overall and fitted with **4½-in. arms**, which are thus wide enough for **glasses, plates, etc.** All joints morticed and pegged. 19-in. seat is **shaped for comfort** and 19-in. high back is set at **correct slope**. Framing and legs, which are **well braced**, are of substantial size.

### CHOICE OF THREE WOODS.

Selected and seasoned first grade timber, **oiled finish**, all suitable for outdoors.

**PRIME RED CEDAR.** Light in weight, making the seat easily portable single handed. Price **36/6**.

**BEST ENGLISH OAK.** Makes a heavier seat, which two can lift. Price **41/9**.

**GENUINE BURMA TEAK.** Imperishable under any conditions. Price **48/-**.

Carriage Paid Station, England and Wales.

## TEAK GARDEN SEATS.

Please ask for Complete List of all Designs.

**Burma Teak—Impervious to Sun, Rain or Snow. Practically indestructible.  
Needs no Reconditioning.**

**Standard Quality and Finish, which cannot be had in "cheap" Teak Seats.**

### Pattern B.

Height overall, 2-ft. 9-in.  
Width of seat, 17½-in.  
Height of back, 14½-in.  
Length 4-ft. ... 36/-  
Length 5-ft. ... 45/-  
Length 6-ft. ... 55/-

These Seats are made for really hard wear and are strongly and sturdily constructed. All joints are morticed and tenoned besides being glued. The seat slats are brass screwed. The back is set at a restful angle and the seat is curved to give the greatest comfort.

Built by craftsmen to last a lifetime. **Your first expenditure on Burma Teakwood Seats is your last.** Being Burma Teak it is rotproof and will stand years of exposure. Supplied in its natural colour, the strength and beauty is retained indefinitely. Unlike so many low priced Teak Seats, these are carefully sanded and smoothly finished.

The "Terna." Hardwood, Rubber Covered both sides, 2/9

The "Bull." Double Rubber Covered, Cork Handle, 3/9

The "International." Rigid Ply Blade, Double Rubber Covered, 2/9

**SPECIAL LINE** of similar balance and weight to above.

Sandpaper and Plain or Cork and Plain, 10d. each.

Double Cork or Cork and Sandpaper, 1/- each.

Rubber and Plain, Rubber and Cork or Rubber and Sandpaper, 1/3 each.

**BALLS** in tubes of 1 dozen, 3/3.

All above Carriage Paid nearest Station, England and Wales.

## PERMANENT TENNIS ENCLOSURES.

The use of **Steel Standards** and **Terminals** of suitable substance is the most satisfactory method of erecting a **Permanent** enclosure. These Standards together with Chain Link Fencing, will give many years of good service with freedom from trouble. The Standards and Terminals have special earth plates insuring rigidity and the line wires are stretched taut by the strainers supplied.

Specification of Ironwork as follows:—

	9-ft.	10-ft.	
L Section Standards, $1\frac{1}{2}$ -in. by $1\frac{1}{2}$ -in. by $\frac{3}{16}$ -in., with Earth Plates ... ..	4/6	5/-	each
L Section Corner Straining Pillars, $2\frac{1}{2}$ -in. by $2\frac{1}{2}$ -in. by $\frac{1}{2}$ -in., with 2 stay bars ... ..	35/-	37/6	"
L Section Gate Terminals, $2\frac{1}{2}$ -in. by $2\frac{1}{2}$ -in. by $\frac{1}{2}$ -in., with 1 stay bar ... ..	25/-	27/-	"

Gate, well braced and wired, complete with fittings, 32/6 each.

All the ironwork in above is painted two coats and finished green. Stouter Chain Link and Smaller Mesh can be supplied at slight extra cost. See page 37.

### COST OF COMPLETE ENCLOSURES.

The cost of an enclosure 40 yds. by 20 yds. by 9-ft. high, 5 line wires and gate hung at corner, is as follows:—

Galvanised Chain Link, 2-in. Mesh, 14G, including Galvanised Line Wire and Binding Wire ... ..	£12	10	0
32 Standards as above ... ..	£7	4	0
3 Corner Pillars and Strainers as above ... ..	£5	5	0
2 Gate Terminals and Strainers, do. ... ..	£2	10	0
1 Gate and Fittings Complete, do. ... ..	£1	12	6
	£29	1	6

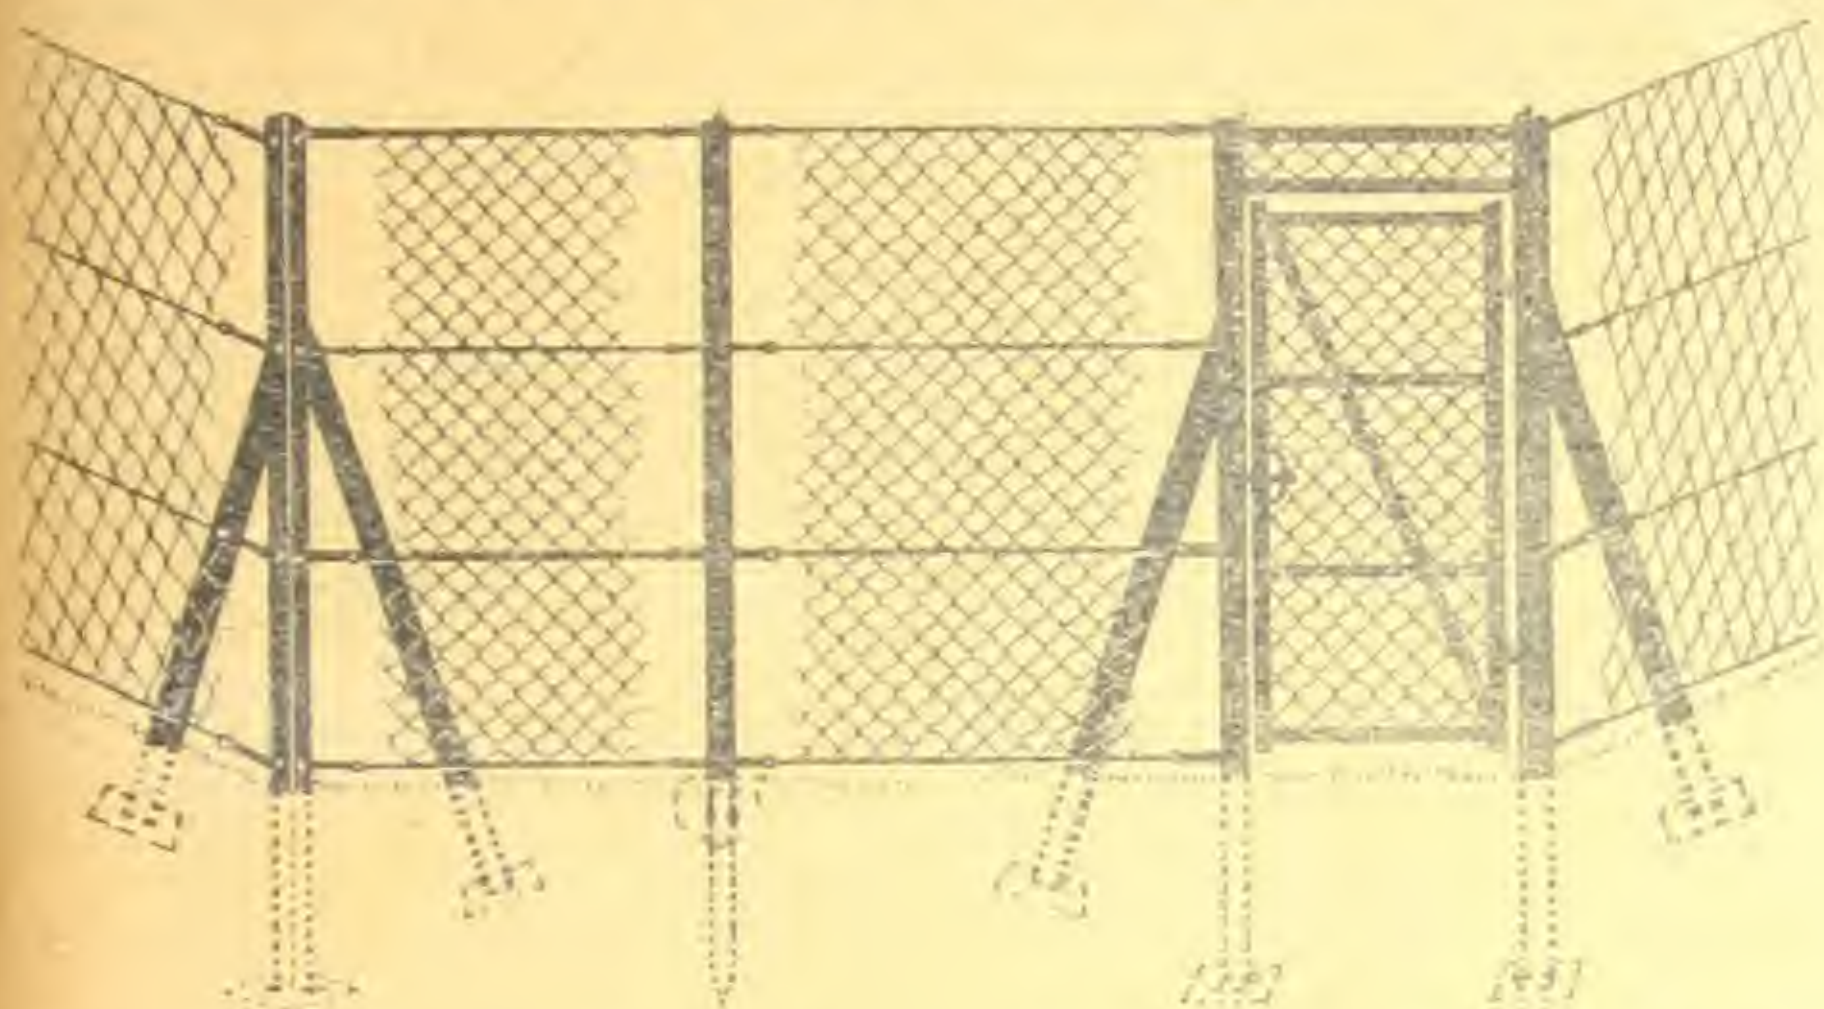

For Enclosure 10-ft. high and 5 lines Wires £31 14 0

If Gate is not fixed in one Corner, the enclosure requires an additional Corner Straining Pillar, at an extra cost of 35/- or 37/6.

All complete surrounds sent Carriage Paid to nearest Station.

## PERMANENT TENNIS ENCLOSURES

The following is a specification of somewhat lighter section ironwork, and, consequently lower in cost. This type is now largely used with the 14G Chain Link and also for Wire Netting. Ironwork is finished Green.

	9-ft.	10-ft.	
L Section Standards, 1½-in. by 1½-in., with Earth Plates ... ..	4/6	5/-	each
L Section Corner Straining Pillars, 2-in. by 2-in. by ½-in., with 2 staybars ...	26/-	30/-	"
L Section Gate Terminals, 2-in. by 2-in. by ½-in., with 1 staybar ... ..	18/-	20/-	"

Gate well braced and wired complete with fittings, 32/6

See page 37 for other meshes in Galvanised Chain Link.

The cost of complete enclosures (**details** as on previous page), is as follows :—

	9-ft.	10-ft.
With 14G 2-in. Mesh Chain Link ...	£27 0 6	£29 13 0
With 18G 2-in. Mesh Wire Netting ...	£20 15 6	£22 14 0
With 19G 1½-in. Mesh Wire Netting [...]	£22 1 6	£24 1 0

If Gate is **not fixed in one Corner**, the Enclosure requires an additional Corner Straining Pillar at an extra cost of 26/- or 30/-.

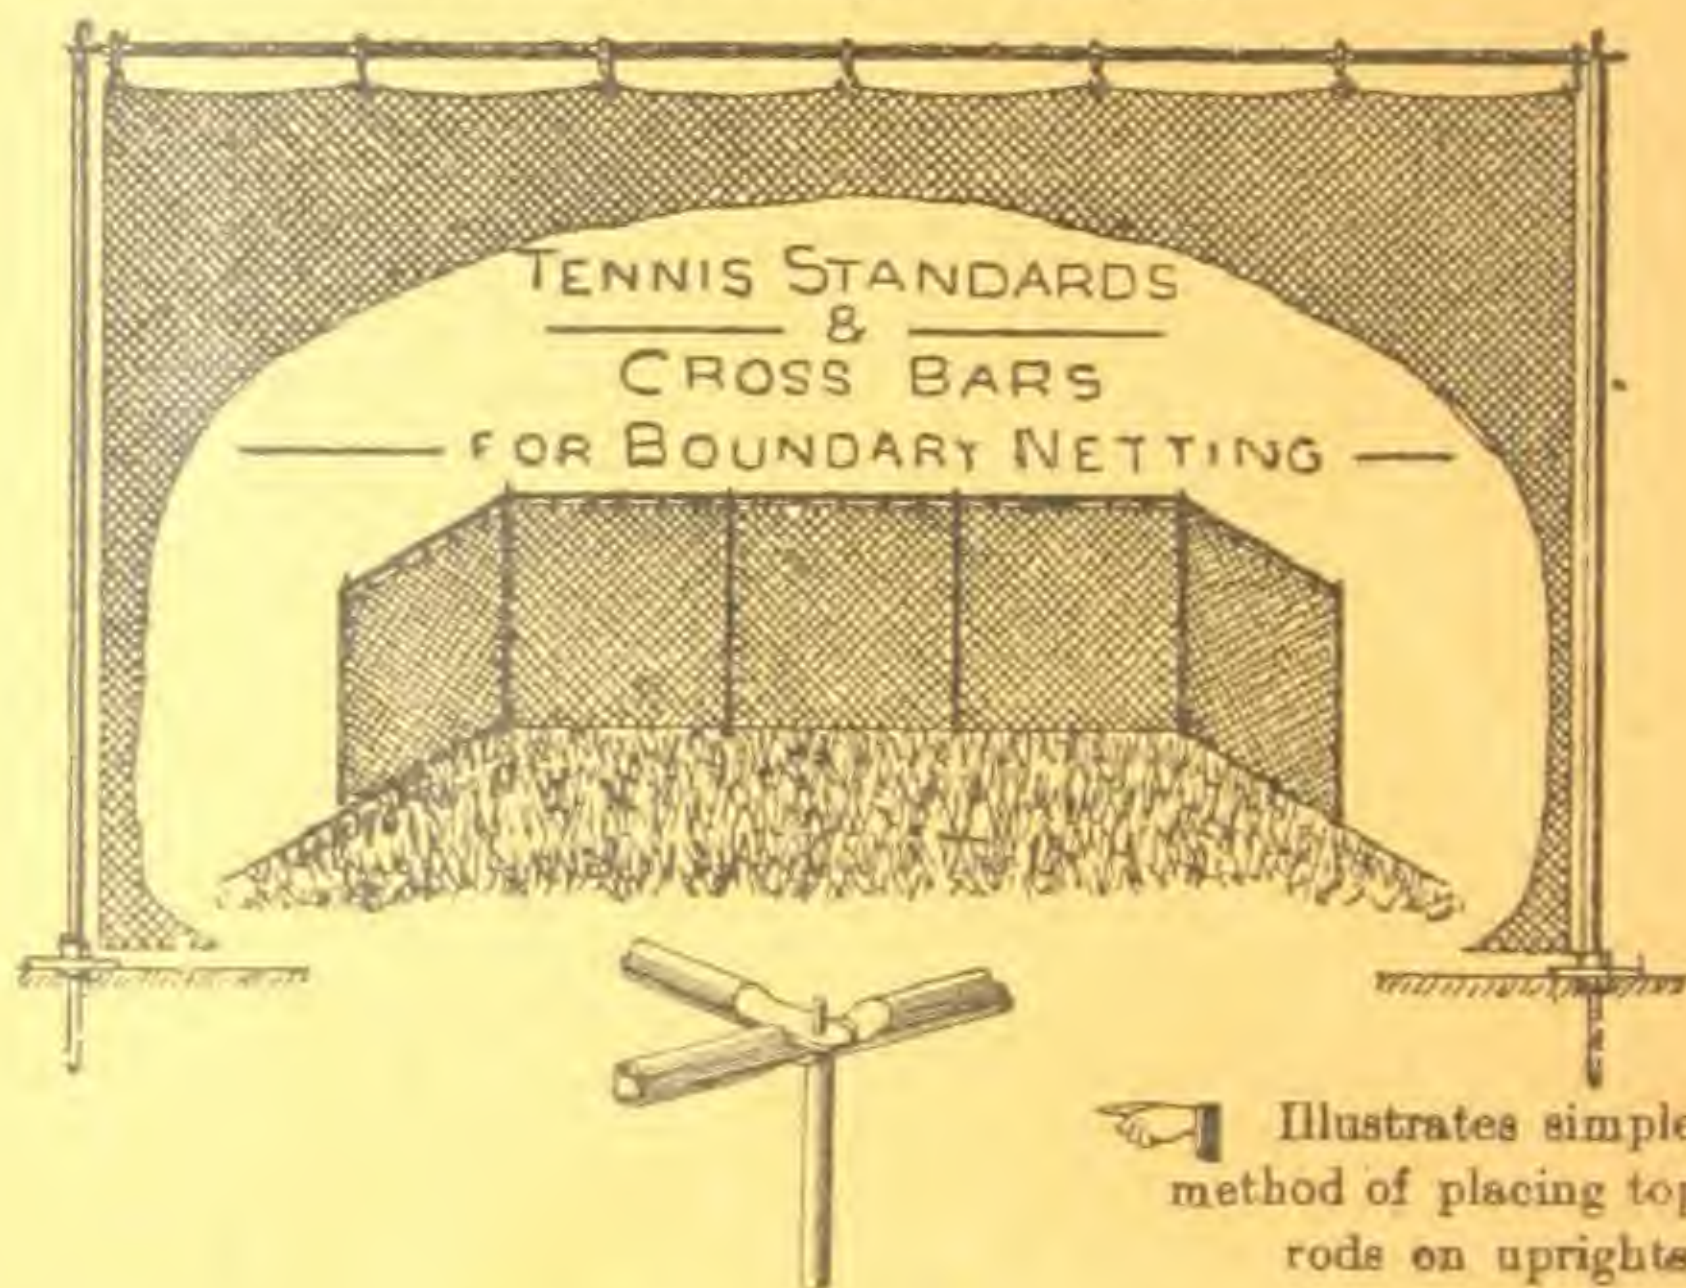

All complete Surrounds sent Carriage Paid to nearest Station.

## Tennis Surrounds and Stop-Net Supports.

By placing the Standards 9 feet apart and connecting same with a Top Rod which is simply placed on the spiked top of the standard, an extremely rigid and upright support is erected. The earth plate on the standard at ground level completes its effectiveness. For plan of enclosure see page 160.

Boundary Netting, see next page.

### STEEL UPRIGHTS. Painted.

	6-ft.	7-ft.	8-ft.	9-ft.	10-ft.	out of ground each.
Ex. Strong Tubular Welded...	2/2	2/4	2/6	2/9	3/3	
Patent "T" Section 1" ...	—	—	—	3/2	3/4	"
" " " 1 1/4" ...	—	—	5/1	5/6	6/-	"

Corner Braces. For supporting the Corner uprights. 17/6 per set of 4 pairs.

### TUBULAR STEEL TOP RODS. Painted Green.

(As illustrated on page 30)

9-ft. long, complete with Hooks, Ex. Strong Quality, 1/4 each.

### Stout Ground Pegs

(As illustrated on page 30)

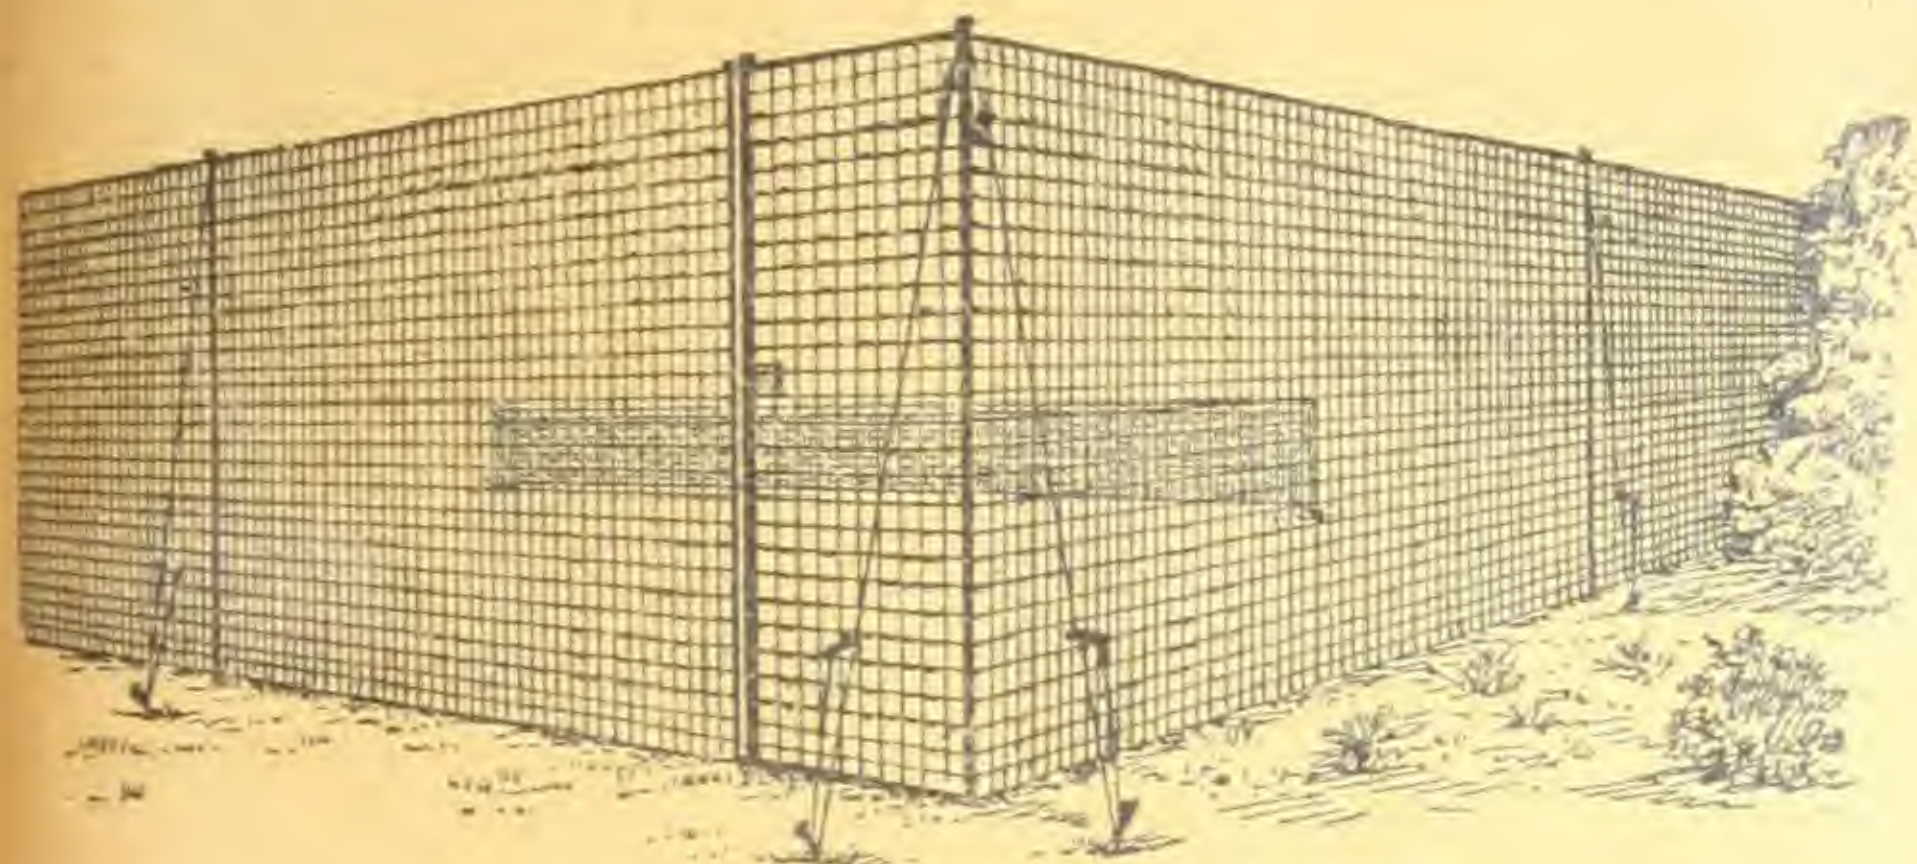

Galvanised Iron, for fixing netting to ground, 1/3 per doz.

Above Carriage Paid on orders of £5 or over.

## Square Mesh Boundary Netting. Steam Tarred.

Fitted with Best Hemp Lines Top and Bottom.

The undermentioned are the best value procurable and thoroughly reliable in all respects. **Any length** can be cut and supplied immediately without any delay. All lengths are complete with top and bottom lines.

	6-ft.	7-ft.	8-ft.	9-ft.	10-ft.	11-ft.	12-ft.	high
No. 2.—Stout 2-Thread Hemp	1/1	1/2	1/3	1/5	1/7	1/9	1/11	yard run
No. 3.—Stout 3-Thread Hemp	1/6	1/7	1/9	1/11	2/1	2/3	2/5	"
No. 4.—Extra Heavy 3-Thread Hemp	...	...	1/11	2/2	2/7	2/9	3/-	3/4 3/8 "

**We advise** Netting to be ordered **1-ft. wider** than actually required, which allows for shrinking and also needs less pegging to ground.

String Netting Carriage Paid on orders of £5 value and over.

**WIRE NETTING** for surround. See page 34.

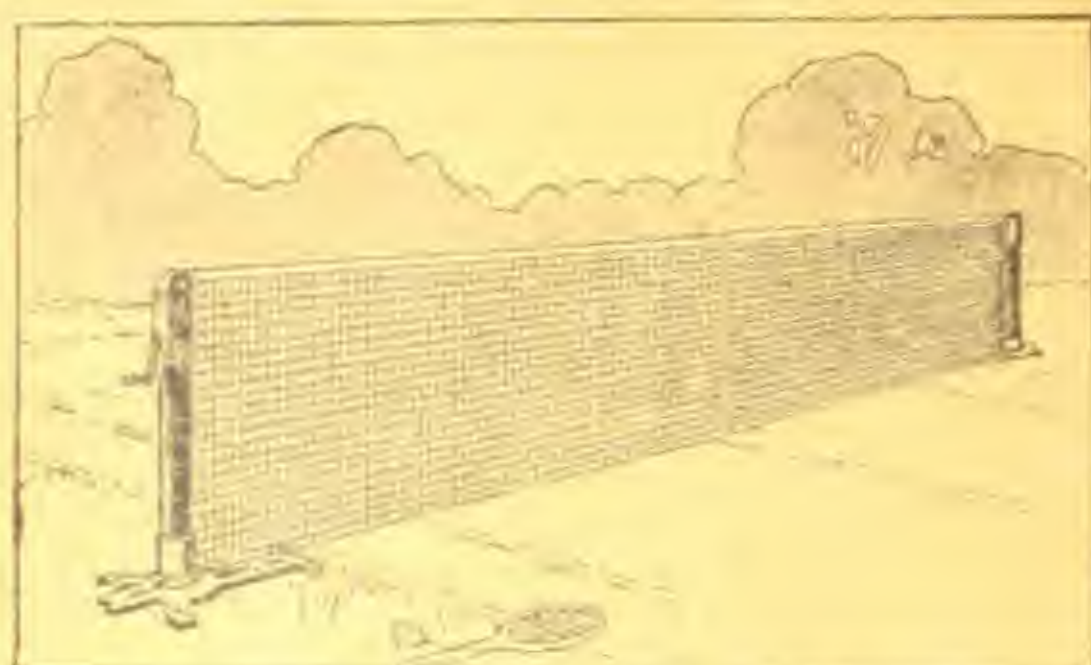

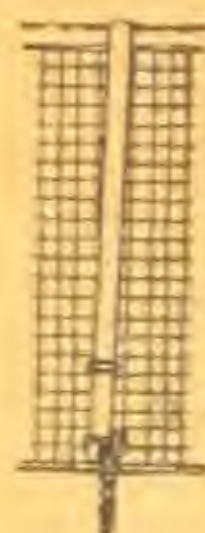

**CHAIN LINK FENCING** " " " page 37.

## Retarring and Repairing.

Hemp **Boundary Netting** is preserved almost indefinitely by periodical retarring and attention. This can be done at Works (conveniently out of season) at a **Nominal Cost** and **Repairs** are effected at the same time. **Centre Nets** can be dealt with in the same way and **Top Bands, Etc.** renewed.

PLEASE COMMUNICATE WITH US.

**Lawn Tennis Nets.****Net Adjuster.**

All Centre Nets are Steam Tarred and made from reliable Hemp.

No.	Net Material	Head Line	42-ft. $\times$ 3 $\frac{1}{2}$ -ft.	36-ft. $\times$ 3 $\frac{1}{2}$ -ft.
3	Stout 3-Thread	Hemp	17/-	16/- each
4	Do.	Steel	21/-	18/6 "
5	Extra Stout 3-Thread	Steel	26/-	—
6	Do.	Copper	31/6	—
7	Best Italian Hemp	Copper	43/6	— "
8	Extra Heavy Hemp Laid Cord	Copper	47/6	— "

Double Tops supplied to above Nos. 3 and 4, 3/9 extra, No. 5, 4/6 and No. 6 5/6 extra.

No. 7 is especially recommended for Heavy Club use, and No. 8 for Hard Courts. The prices for these two include Double Tops.

**Net Adjuster.**

Best Web Band with Iron Foot and Adjustable Slide,	Price 4/9 each,
Hard Court Net Adjuster, with weighted Base. ...	" 4/9 "

No. 1.	Extra Stout Copper Line, fitted Hemp end and Pin ...	8/9 each
No. 2.	Stout Galvanized Steel Line (Loop one end and other end soldered) ...	4/9 "
No. 4.	Extra Stout Hemp Line ...	2/3 "

**Tennis Net Top Bands.**

No. 1.	Super Quality Web Band, with reinforced centre, 4-in. wide	6/9 each
No. 3.	Strong Flax, double selvages, 4-in. wide ...	3/6 "

All above Carriage paid Station, England and Wales.

## TENNIS COURT MARKERS.

### Improved Marker. No. 8.

Strong well made Marker, specially constructed with rounded bottom to ensure no waste in fluid. Wrought-iron frame and tank, with cast-iron wheels, no rubber band required. Cannot get out of order. Marks with a distinct clear  $1\frac{1}{2}$ -in. line.

Capacity, 6 pints ... **25/9** each  
Specially recommended.

No. 9. Similar to No. 8, but cast square bottom tank.

Capacity, 8 pints ( $1\frac{1}{2}$ -in. line),  
**26/9** each.

Capacity,  $3\frac{1}{2}$  galls (2-in. line),  
**52/9** each.

### Popular Marker.

Supplied complete with lift-off cover as illustrated. Avoids spilling. A reliable machine giving a clear line. Capacity, 5 pints ( $1\frac{1}{2}$ -in. marking line), **21/-** each.

Capacity, 12 pints (2-in. marking line), **36/9** each.

All above Carriage Paid Station, England and Wales.

### Court Marking Pins.

Cast Iron Set of 8 L's and 2 T's White Enamelled.

Price 3/6 the Set. Carriage Paid.

Wrought Iron, Galvanized. 4/- the set. Carriage Paid.

## ALL STEEL TENNIS POSTS.

Impervious to Weather Conditions.

Green Enamelled Finish.

Extra Heavy Pattern.

Round 4-in. diameter solid drawn Steel Tube with gunmetal worm winder protected from weather by polished aluminium cap to post. Other fittings plated and posts are green enamelled.

For **Grasscourts**, with screws and spanner.

For **Hardcourts**, with deep socket bases and caps.

Either Set, 115/6 complete.

Lighter Pattern.

Round 2 1/4-in. diameter Post, made in one piece from cold drawn steel, green enamelled and fitted with worm winder.

For **Grasscourts**, with 4 "T" stakes, 70/-.

or

With screws and spanner, 72/6.

For **Hardcourts**, with socket bases and caps, 77/-.

All above Carriage Paid England and Wales.

### The "Britain" Set.

2½-in. Round Poles.

Although the price of this Set is so low, the same quality is maintained as all through our series, careful designing, selected timber, and full guarantee against defects.

Fitted with Ratchet Winder, which is covered and weather-proof. Also the well-known spade sockets, which leave no projection above ground. Poles are locked in the base and are fixed and removed instantly.

Set complete with Driving Plug, 43/6.

All above Carriage Paid Station, England and Wales.

## TENNIS POSTS.

Best Ash Poles, 3-in. square, fitted with inside worm winder.

### For Grasscourts.

No. 6. With 4 "T" stakes, 72/6.

No. 6A. With ground screws and spanner, 75/6.

### HEAVIER PATTERN.

Best Ash Poles, 3½-in. square, fitted with inside worm winder.

### For Grasscourts.

No. 5. With 6 "T" stakes, 98/6.

No. 5A. With ground screws and spanner, 95/6.

### For Hardcourts.

No. 5B. As No. 5, but with deep socket bases and caps, 101/6.

Round 3-in. diameter Poles with outside worm winder.

### For Grasscourts.

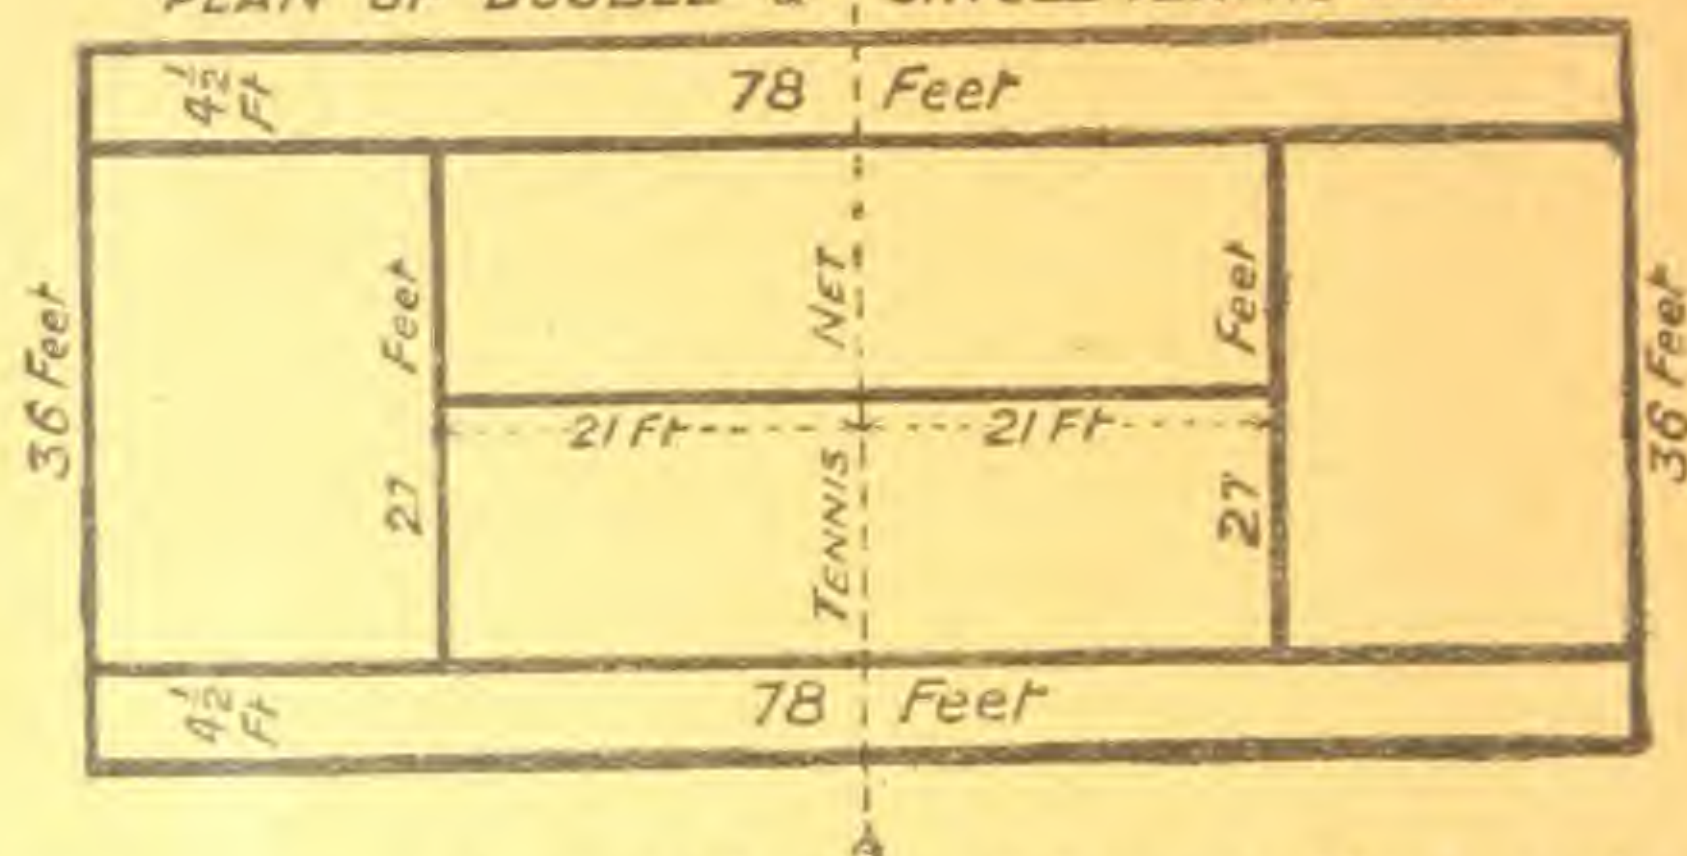

No. 4. With 4 "T" stakes, 55/-.

No. 4A. With ground screws and spanner, 57/6.

## PLAN OF DOUBLE &amp; SINGLE TENNIS COURT

Posts stand 3-ft. outside the Side Lines, i.e., 42-ft. apart. Allow as much space as possible behind Base Lines. Size of enclosure recommended is 117-ft. by 54-ft., and this enclosure would take 38 Uprights, 38 Top Rods, and 114 yards of Netting. String Netting should be ordered 1-ft. wider than height of Standards. Also see details of Permanent Surrounds.

## Tennis Balls.

**L.T.A. Official**, 13/6 per dozen.

**Club Ball**. Made strictly to L.T.A. requirements in size, weight and bound, 8/- per dozen.

**Ball Nets** to hold Six Balls, 3d. each.

## Hard Court Tape Lines.

**Lead Tape** 1-in. side lines, 1 1/2-in. back lines and 2-in. centre line. Complete set for

Double Court with Galvanised nails £6 5 0

Ex. Heavy Lead Tapes as above ... £7 17 6

Carriage Paid.

## Lawn Tennis Tape Measures.

Ass skin Case, 1/2-in. tape. ... 5/3 each.

Brass Case, 1/2-in. tape ... 7/9 each.

Solid Leather Case, 1/2-in. tape 10/6 each.

Carriage Paid.
